INTRODUCTION

Doing Business sheds light on how easy or difficult it is for a local entrepreneur to open and run a small to medium-size business when complying with relevant regulations. It measures and tracks changes in regulations affecting 11 areas in the life cycle of a business: starting a business, dealing with construction permits, getting electricity, registering property, getting credit, protecting minority investors, paying taxes, trading across borders, enforcing contracts, resolving insolvency and labor market regulation.

In a series of annual reports *Doing Business* presents quantitative indicators on business regulations and the protection of property rights that can be compared across 189 economies, from Afghanistan to Zimbabwe, over time. The data set covers 47 economies in Sub-Saharan Africa, 32 in Latin America and the Caribbean, 25 in East Asia and the Pacific, 26 in Eastern Europe and Central Asia, 20 in the Middle East and North Africa and 8 in South Asia, as well as 31 OECD high-income economies. The indicators are used to analyze economic outcomes and identify what reforms have worked, where and why.

This economy profile presents the *Doing Business* indicators for Romania. To allow useful comparison, it also provides data for other selected economies (comparator economies) for each indicator. The data in this report are current as of June

1, 2014 (except for the paying taxes indicators, which cover the period January–December 2013).

The *Doing Business* methodology has limitations. Other areas important to business—such as an economy's proximity to large markets, the quality of its infrastructure services (other than those related to trading across borders and getting electricity), the security of property from theft and looting, the transparency of government procurement, macroeconomic conditions or the underlying strength of institutions—are not directly studied by *Doing Business*. The indicators refer to a specific type of business, generally a local limited liability company operating in the largest business city. Because standard assumptions are used in the data collection, comparisons and benchmarks are valid across economies. The data not only highlight the extent of obstacles to doing business; they also help identify the source of those obstacles, supporting policy makers in designing regulatory reform.

More information is available in the full report. *Doing Business 2015* presents the indicators, analyzes their relationship with economic outcomes and presents business regulatory reforms. The data, along with information on ordering *Doing Business 2015*, are available on the *Doing Business* website at <http://www.doingbusiness.org>.

CHANGES IN *DOING BUSINESS 2015*

As part of a 2-year update in methodology, *Doing Business 2015* incorporates 7 important changes. First, the ease of doing business ranking as well as all topic-level rankings are now computed on the basis of distance to frontier scores (see the chapter on the distance to frontier and ease of doing business ranking). Second, for the 11 economies with a population of more than 100 million, data for a second city have been added to the data set and the ranking calculation. These economies are Bangladesh, Brazil, China, India, Indonesia, Japan, Mexico, Nigeria, Pakistan, the Russian Federation and the United States. Third, for getting credit, the methodology has been revised for both the strength of legal rights index and the depth of credit information index. The number of points has been increased in both indices, from 10 to 12 for the strength of legal rights index and from 6 to 8 for the depth of credit information index. In addition, only credit bureaus and registries that cover at least 5% of the adult population can receive a score on the depth of credit information index.

Fourth, the name of the protecting investors indicator set has been changed to protecting minority investors to better reflect its scope—and the scope of the indicator set has been expanded to include shareholders' rights in corporate governance beyond related-party transactions. Fifth, the resolving insolvency indicator set has been expanded to include an index measuring the strength of the legal framework for insolvency. Sixth, the calculation of the distance to frontier score for paying taxes has been changed. The total tax rate component now enters the score in a nonlinear fashion, in an approach different from that used for all other indicators (see the chapter on the distance to frontier and ease of doing business ranking).

Finally, the name of the employing workers indicator set has been changed to labor market regulation, and the scope of this indicator set has also been changed. The indicators now focus on labor market regulation applying to the retail sector rather than the manufacturing sector, and their coverage has been expanded to include regulations on labor disputes and on benefits provided to workers. The labor market regulation indicators continue to be excluded from the aggregate distance to frontier score and ranking on the ease of doing business.

Beyond these changes there are 3 other updates in methodology. For paying taxes, the financial statement variables have been updated to be proportional to 2012 income per capita; previously they were proportional to 2005 income per capita. For enforcing contracts, the value of the claim is now set at twice the income per capita or \$5,000, whichever is greater. For dealing with construction permits, the cost of construction is now set at 50 times income per capita (before, the cost was assessed by the *Doing Business* respondents). In addition, this indicator set no longer includes the procedures for obtaining a landline telephone connection.

For more details on the changes, see the "What is changing in *Doing Business*?" chapter starting on page 24 of the *Doing Business 2015* report. For more details on the data and methodology, please see the "Data Notes" chapter starting on page 114 of the *Doing Business 2015* report. For more details on the distance to frontier metric, please see the "Distance to frontier and ease of doing business ranking" chapter in this profile.

THE BUSINESS ENVIRONMENT

For policy makers trying to improve their economy's regulatory environment for business, a good place to start is to find out how it compares with the regulatory environment in other economies. *Doing Business* provides an aggregate ranking on the ease of doing business based on indicator sets that measure and benchmark regulations applying to domestic small to medium-size businesses through their life cycle. Economies are ranked from 1 to 189 by the ease of doing business ranking. This year's report presents results for 2 aggregate measures: the distance to frontier score and the ease of doing business ranking. The ranking of economies is determined by sorting the aggregate distance to frontier (DTF) scores. The distance to frontier score benchmarks economies with respect to regulatory practice, showing the absolute distance to the best performance in each *Doing Business* indicator. An economy's distance to frontier score is indicated on a scale from 0 to 100, where 0 represents the worst performance and 100 the frontier. (See the chapter on the distance to frontier and ease of doing business). The 10 topics included in the ranking in *Doing Business 2015*: starting a business, dealing with construction permits, getting electricity, registering property, getting credit, protecting minority investors, paying taxes, trading across borders, enforcing contracts and resolving insolvency. The labor market regulation indicators (formerly employing workers) are not included in this year's aggregate ease of doing business ranking, but the data are presented in this year's economy profile.

The aggregate ranking on the ease of doing business benchmarks each economy's performance on the indicators against that of all other economies in the *Doing Business* sample (figure 1.1). While this ranking tells much about the business environment in an economy, it does not tell the whole story. The ranking on the ease of doing business, and the underlying indicators, do not measure all aspects of the business environment that matter to firms and investors or that affect the competitiveness of the economy. Still, a high ranking does mean that the government has created a regulatory environment conducive to operating a business.

ECONOMY OVERVIEW

Region: Europe & Central Asia

Income category: Upper middle income

Population: 19,963,581

GNI per capita (US\$): 9,060

DB2015 rank: 48

DB2014 rank: 50*

Change in rank: 2

DB 2015 DTF: 70.2

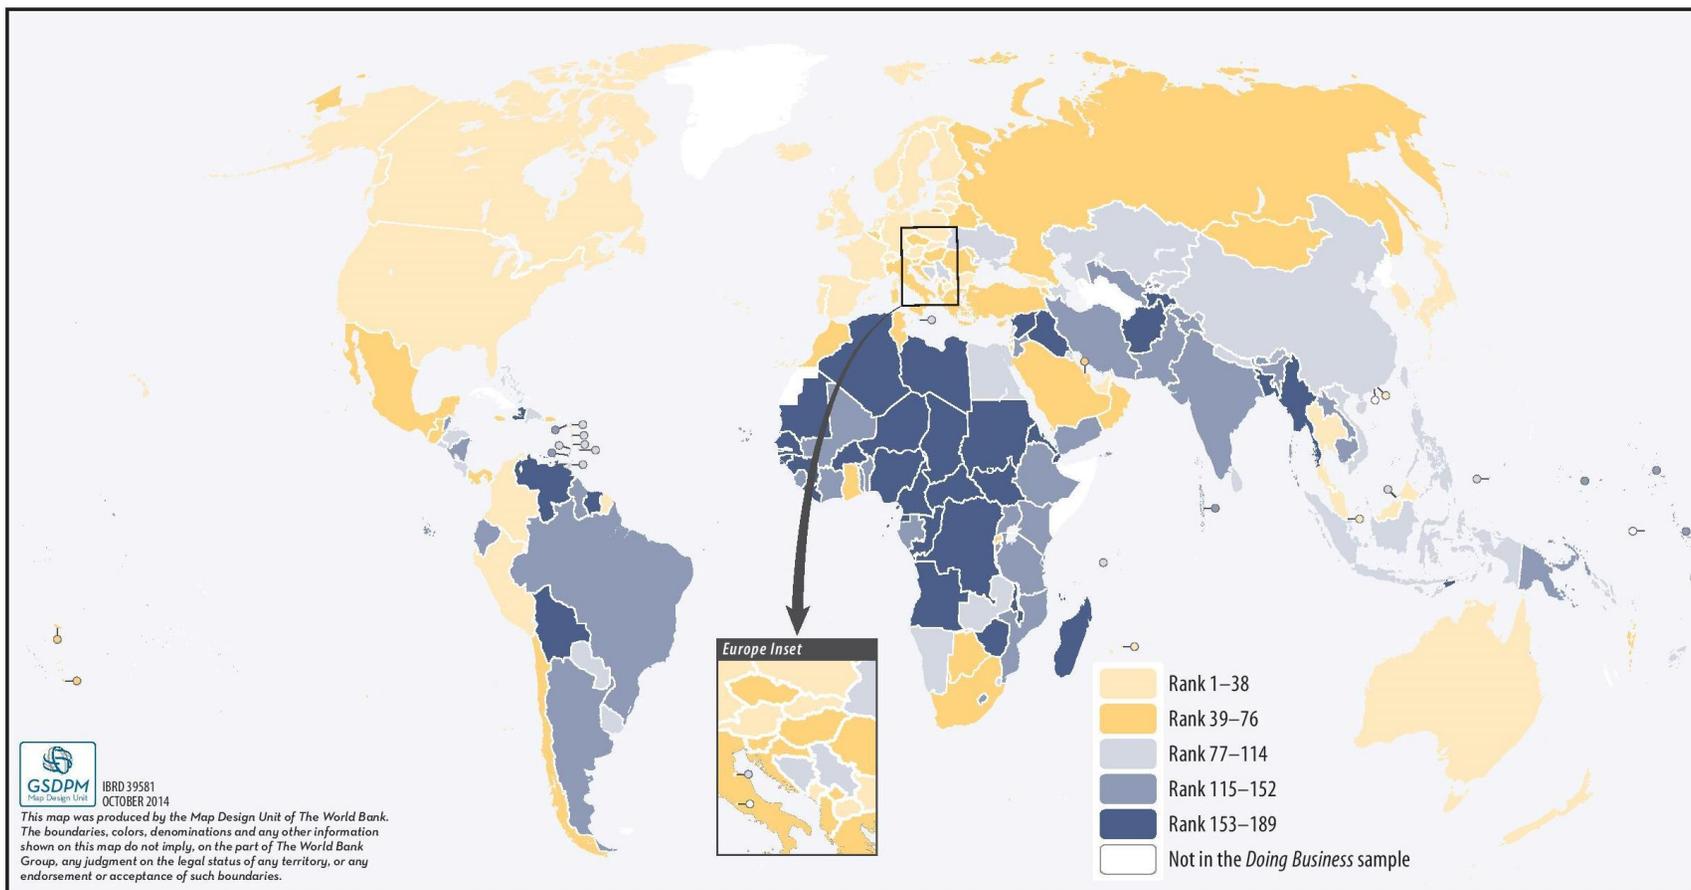

DB 2014 DTF: 68.5

Change in DTF: 1.7

* DB2014 ranking shown is not last year's published ranking but a comparable ranking for DB2014 that captures the effects of such factors as data corrections and the changes in methodology. See the data notes starting on page 114 of the *Doing Business 2015* report for sources and definitions.

THE BUSINESS ENVIRONMENT

Figure 1.1 Where economies stand in the global ranking on the ease of doing business

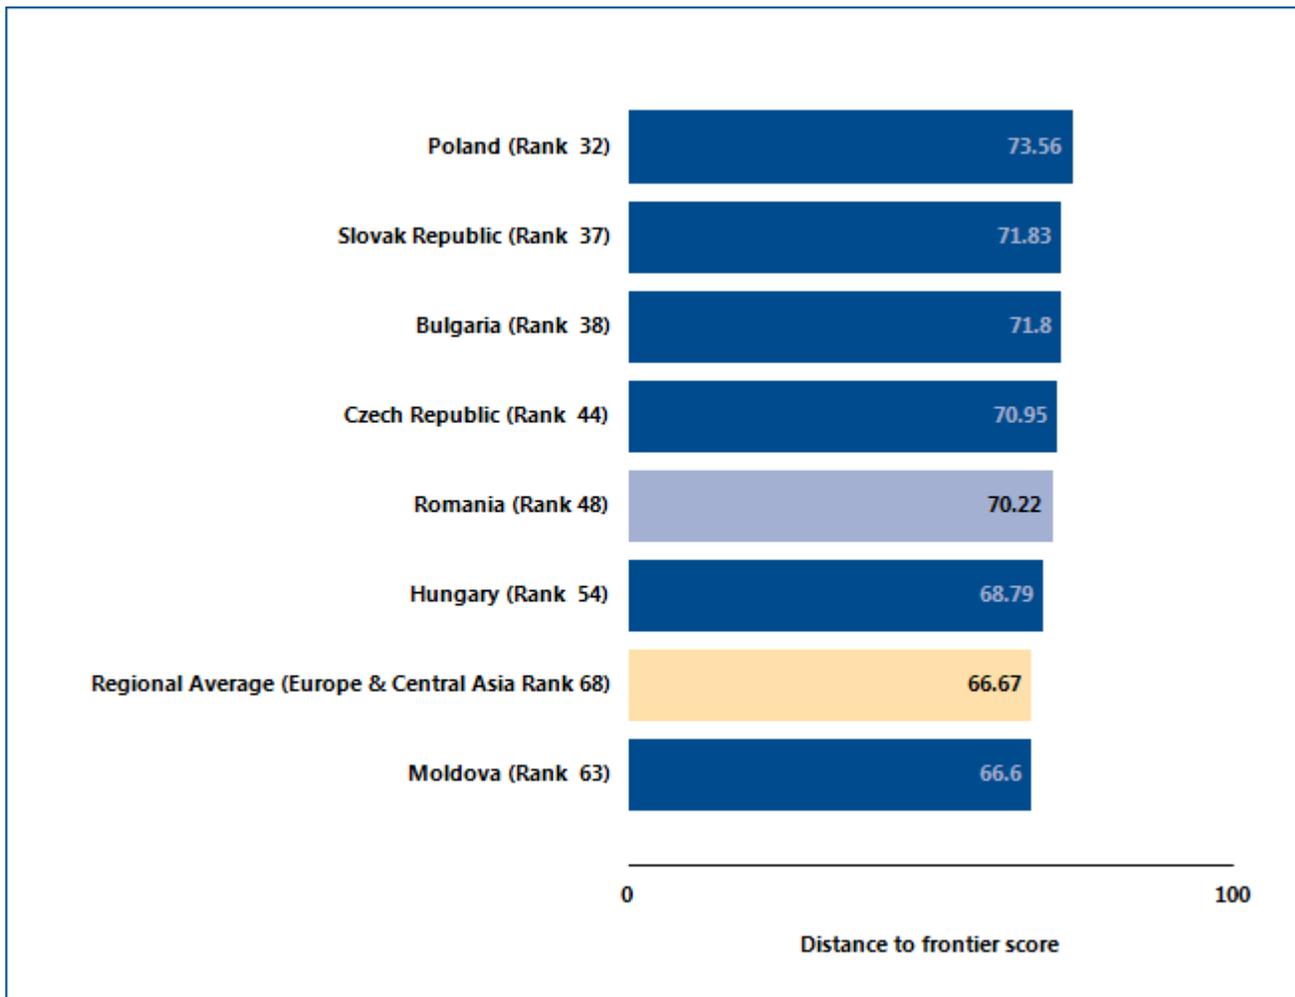

Source: *Doing Business* database.

THE BUSINESS ENVIRONMENT

For policy makers, knowing where their economy stands in the aggregate ranking on the ease of doing business is useful. Also useful is to know how it ranks relative to comparator economies and relative to the

regional average (figure 1.2). The economy's rankings (figure 1.3) and distance to frontier scores (figure 1.4) on the topics included in the ease of doing business ranking provide another perspective.

Figure 1.2 How Romania and comparator economies rank on the ease of doing business

Note: The rankings are benchmarked to June 2014 and based on the average of each economy's distance to frontier (DTF) scores for the 10 topics included in this year's aggregate ranking. The distance to frontier score benchmarks economies with respect to regulatory practice, showing the absolute distance to the best performance in each *Doing Business* indicator. An economy's distance to frontier score is indicated on a scale from 0 to 100, where 0 represents the worst performance and 100 the frontier. For the economies for which the data cover 2 cities, scores are a population-weighted average for the 2 cities.

THE BUSINESS ENVIRONMENT

Just as the overall ranking on the ease of doing business tells only part of the story, so do changes in that ranking. Yearly movements in rankings can provide some indication of changes in an economy’s regulatory environment for firms, but they are always relative.

Moreover, year-to-year changes in the overall rankings do not reflect how the business regulatory environment in an economy has changed over time—or how it has changed in different areas. To aid in assessing such changes,

Doing Business introduced the distance to frontier score. This measure shows how far on average an economy is from the best performance achieved by any economy on each *Doing Business* indicator.

Comparing the measure for an economy at 2 points in time allows users to assess how much the economy’s regulatory environment as measured by *Doing Business* has changed over time—how far it has moved toward (or away from) the most efficient practices and strongest regulations in areas covered by *Doing Business* (figure 1.5).

Figure 1.5 How far has Romania come in the areas measured by *Doing Business*?

Note: The distance to frontier score shows how far on average an economy is from the best performance achieved by any economy on each *Doing Business* indicator since 2010, except for getting credit, paying taxes, protecting minority investors and resolving insolvency which had methodology changes in 2014 and thus are only comparable to 2013. The measure is normalized to range between 0 and 100, with 100 representing the best performance (the frontier). See the data notes starting on page 114 of the *Doing Business 2015* report for more details on the distance to frontier score.

Source: *Doing Business* database.

THE BUSINESS ENVIRONMENT

The absolute values of the indicators tell another part of the story (table 1.1). The indicators, on their own or in comparison with the indicators of a good practice economy or those of comparator economies in the region, may reveal bottlenecks reflected in large numbers of procedures, long delays or high costs. Or they may reveal unexpected strengths in an area of business

regulation—such as a regulatory process that can be completed with a small number of procedures in a few days and at a low cost. Comparison of the economy's indicators today with those in the previous year may show where substantial bottlenecks persist—and where they are diminishing.

Indicator	Romania DB2015	Romania DB2014	Bulgaria DB2015	Czech Republic DB2015	Hungary DB2015	Moldova DB2015	Poland DB2015	Slovak Republic DB2015	Best performer globally DB2015
Time (years)	3.3		3.3	2.1	2.0	2.8	3.0	4.0	Ireland (0.4)
Cost (% of estate)	10.5	10.5	9.0	17.0	14.5	15.0	15.0	18.0	Norway (1.0)
Outcome (0 as piecemeal sale and 1 as going concern)	0	0	0	1	0	0	1	1	
Recovery rate (cents on the dollar)	30.7	30.0	33.2	65.6	40.2	29.4	57.0	54.4	Japan (92.9)
Strength of insolvency framework index (0-16)	13.5	13.5	15.0	13.5	9.0	12.0	12.5	13.0	5 Economies (15.0)*

Note: DB2014 rankings shown are not last year's published rankings but comparable rankings for DB2014 that capture the effects of such factors as data corrections and changes to the methodology. Trading across borders deflated and non-deflated values are identical in DB2015 because it is defined as the base year for the deflator. The best performer on time for paying taxes is defined as the lowest time recorded among all economies in the DB2015 sample that levy the 3 major taxes: profit tax, labor taxes and mandatory contributions, and VAT or sales tax. If an economy has no laws or regulations covering a specific area—for example, insolvency—it receives a “no practice” mark. Similarly, an economy receives a “no practice” or “not possible” mark if regulation exists but is never used in practice or if a competing regulation prohibits such practice. Either way, a “no practice” mark puts the economy at the bottom of the ranking on the relevant indicator.

* Two or more economies share the top ranking on this indicator. A number shown in place of an economy's name indicates the number of economies that share the top ranking on the indicator. For a list of these economies, see the *Doing Business* website (<http://www.doingbusiness.org>).

Source: *Doing Business* database.

STARTING A BUSINESS

Formal registration of companies has many immediate benefits for the companies and for business owners and employees. Legal entities can outlive their founders. Resources are pooled as several shareholders join forces to start a company. Formally registered companies have access to services and institutions from courts to banks as well as to new markets. And their employees can benefit from protections provided by the law. An additional benefit comes with limited liability companies. These limit the financial liability of company owners to their investments, so personal assets of the owners are not put at risk. Where governments make registration easy, more entrepreneurs start businesses in the formal sector, creating more good jobs and generating more revenue for the government.

What do the indicators cover?

Doing Business measures the ease of starting a business in an economy by recording all procedures officially required or commonly done in practice by an entrepreneur to start up and formally operate an industrial or commercial business—as well as the time and cost required to complete these procedures. It also records the paid-in minimum capital that companies must deposit before registration (or within 3 months). The ranking of economies on the ease of starting a business is determined by sorting their distance to frontier scores for starting a business. These scores are the simple average of the distance to frontier scores for each of the component indicators.

To make the data comparable across economies, *Doing Business* uses several assumptions about the business and the procedures. It assumes that all information is readily available to the entrepreneur and that there has been no prior contact with officials. It also assumes that the entrepreneur will pay no bribes. And it assumes that the business:

- Is a limited liability company, located in the largest business city and is 100% domestically owned¹.
- Has between 10 and 50 employees.
- Conducts general commercial or industrial activities.
- Has a start-up capital of 10 times income per capita.
- Has a turnover of at least 100 times income per capita.
- Does not qualify for any special benefits.
- Does not own real estate.

WHAT THE STARTING A BUSINESS

INDICATORS MEASURE

Procedures to legally start and operate a company (number)

- Preregistration (for example, name verification or reservation, notarization)
- Registration in the economy's largest business city¹
- Postregistration (for example, social security registration, company seal)

Time required to complete each procedure (calendar days)

- Does not include time spent gathering information
- Each procedure starts on a separate day (2 procedures cannot start on the same day). Procedures that can be fully completed online are recorded as ½ day.
- Procedure completed once final document is received
- No prior contact with officials

Cost required to complete each procedure (% of income per capita)

- Official costs only, no bribes
- No professional fees unless services required by law

Paid-in minimum capital (% of income per capita)

- Deposited in a bank or with a notary before registration (or within 3 months)

¹ For the 11 economies with a population of more than 100 million, data for a second city have been added.

STARTING A BUSINESS

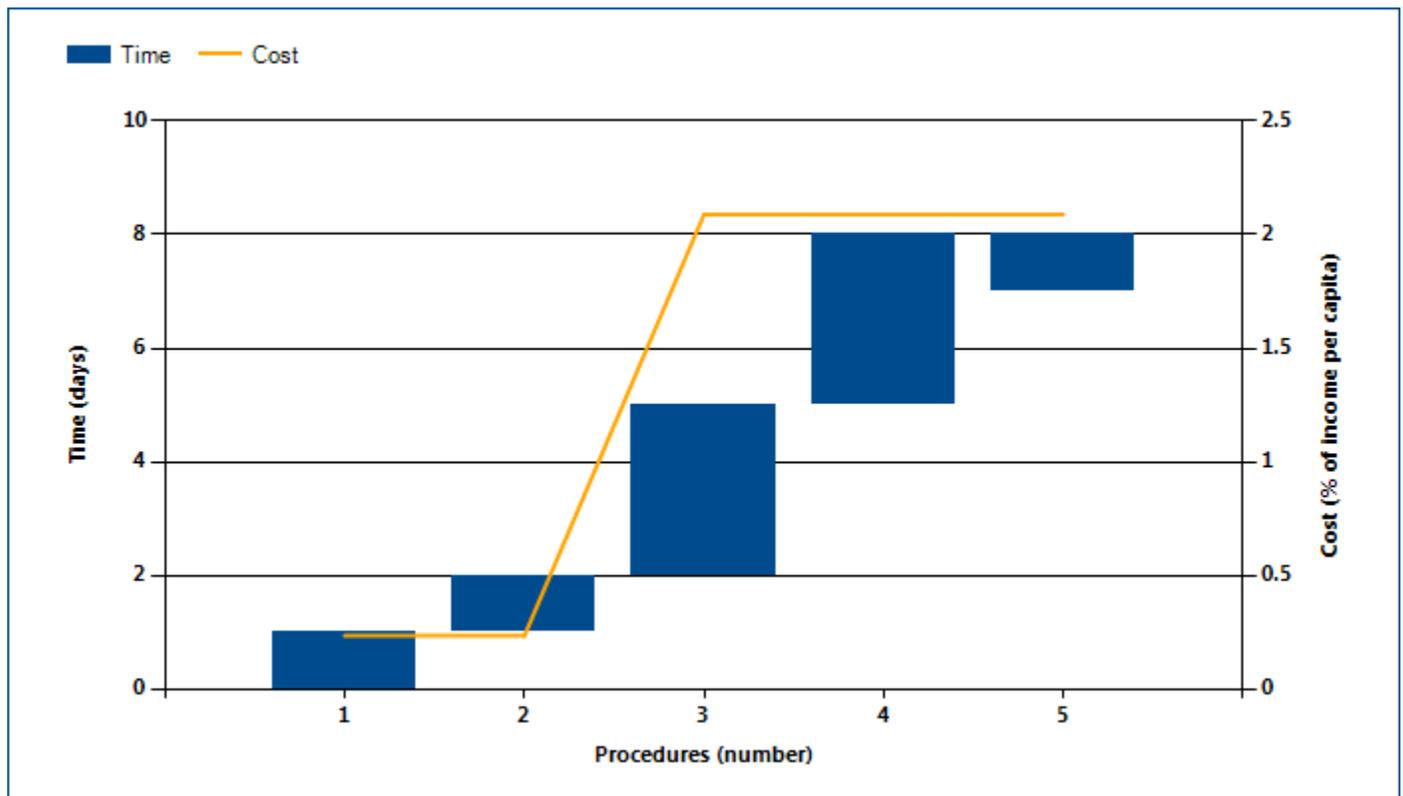

Where does the economy stand today?

What does it take to start a business in Romania? According to data collected by *Doing Business*, starting a business there requires 5.0 procedures, takes 8.0 days, costs 2.1% of income per capita and requires paid-in minimum capital of 0.7% of income per capita (figure 2.1). Most indicator sets refer to a case scenario in the

largest business city of an economy, except for 11 economies for which the data are a population-weighted average of the 2 largest business cities. See the chapter on distance to frontier and ease of doing business ranking at the end of this profile for more details.

Figure 2.1 What it takes to start a business in Romania -

Paid-in minimum capital (% of income per capita): 0.7

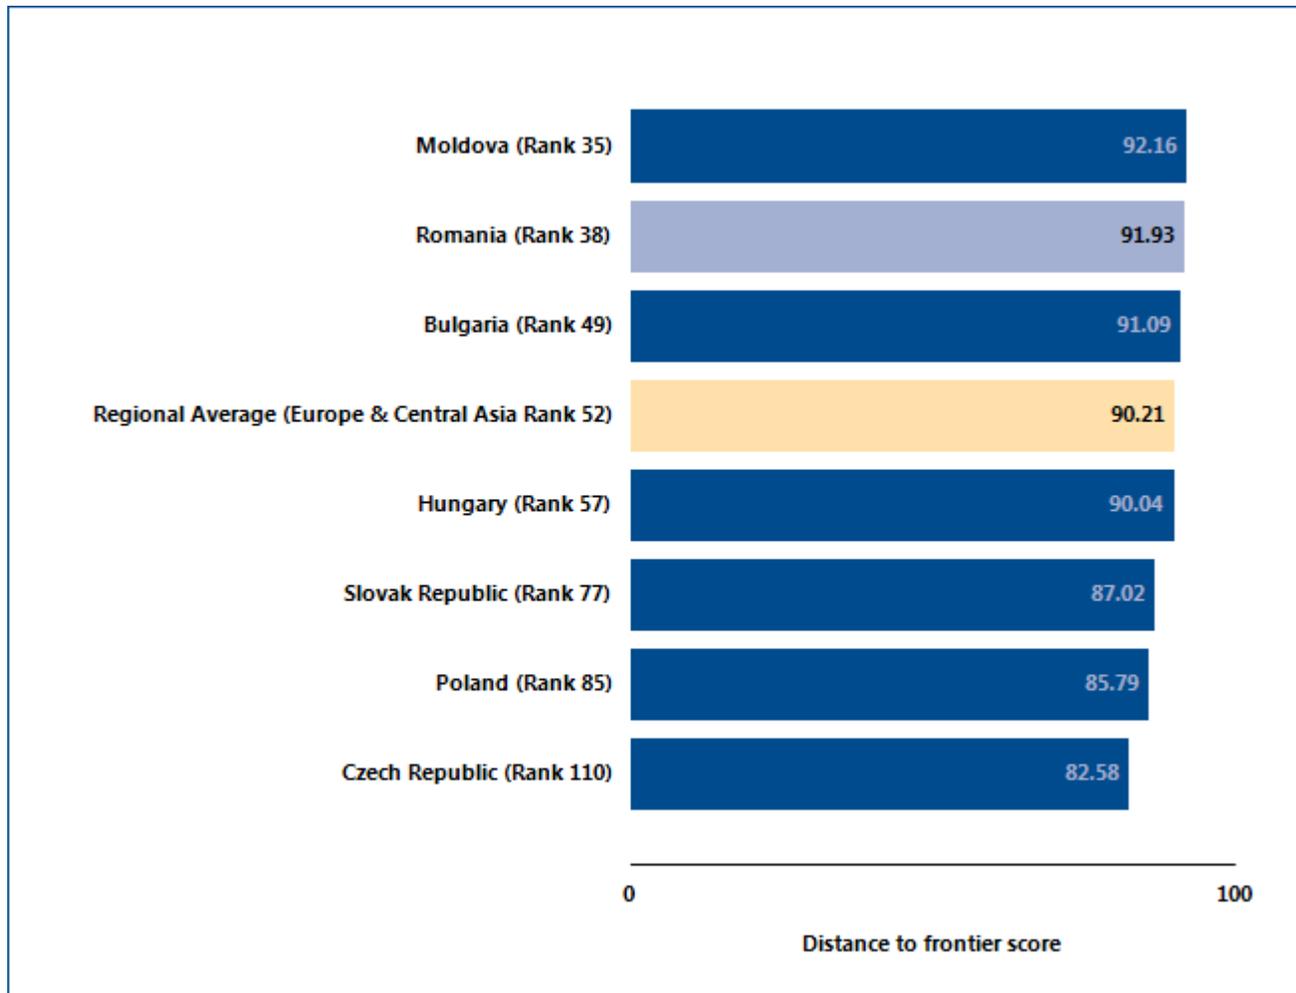

Note: Time shown in the figure above may not reflect simultaneity of procedures. Online procedures account for 0.5 days in the total time calculation. For more information on the methodology of the starting a business indicators, see the *Doing Business* website (<http://www.doingbusiness.org>). For details on the procedures reflected here, see the summary at the end of this chapter. Source: *Doing Business* database.

STARTING A BUSINESS

Globally, Romania stands at 38 in the ranking of 189 economies on the ease of starting a business (figure 2.2). The rankings for comparator economies and the regional

average ranking provide other useful information for assessing how easy it is for an entrepreneur in Romania to start a business.

Figure 2.2 How Romania and comparator economies rank on the ease of starting a business

Source: Doing Business database.

STARTING A BUSINESS

Economies around the world have taken steps making it easier to start a business—streamlining procedures by setting up a one-stop shop, making procedures simpler or faster by introducing technology and reducing or eliminating minimum capital requirements. Many have undertaken business registration reforms in stages—and

they often are part of a larger regulatory reform program. Among the benefits have been greater firm satisfaction and savings and more registered businesses, financial resources and job opportunities.

What business registration reforms has *Doing Business* recorded in Romania (table 2.1)?

Table 2.1 How has Romania made starting a business easier—or not?
By *Doing Business* report year from DB2010 to DB2015

DB year	Reform
DB2012	Romania made starting a business more difficult by requiring a tax clearance certificate for a new company's headquarters before company registration.
DB2013	Romania made starting a business easier by reducing the time required to obtain a clearance certificate from the fiscal administration agency.
DB2014	Romania made starting a business easier by transferring responsibility for issuing the headquarters clearance certificate from the Fiscal Administration Office to the Trade Registry.

Note: For information on reforms in earlier years (back to DB2005), see the *Doing Business* reports for these years, available at <http://www.doingbusiness.org>.

Source: *Doing Business* database.

STARTING A BUSINESS

What are the details?

Underlying the indicators shown in this chapter for Romania is a set of specific procedures—the bureaucratic and legal steps that an entrepreneur must complete to incorporate and register a new firm. These are identified by *Doing Business* through collaboration with relevant local professionals and the study of laws, regulations and publicly available information on business entry in that economy. Following is a detailed summary of those procedures, along with the associated time and cost. These procedures are those that apply to a company matching the standard assumptions (the “standardized company”) used by *Doing Business* in collecting the data (see the section in this chapter on what the indicators measure).

STANDARDIZED COMPANY

Legal form: Societate cu răspundere limitată - Limited Liability Company

Paid in minimum capital requirement: RON 200

City: Bucharest

Start-up Capital: 10 times GNI per capita

Table 2.2 Summary of time, cost and procedures for starting a business in Romania -

No.	Procedure	Time to complete	Cost to complete
1	<p>Evidence of verification of company name availability and reservation thereof</p> <p>According to the Methodological Norms on keeping the trade register, making reservations and release of information:</p> <ul style="list-style-type: none"> - The reservation of a company name is requested at the trade register office by application and is checked and made at national level so that company names are protected at national level as well. <p>A company name shall not include words like: “științific”, “academie”, “academic”, “universitate”, “universitar”, “școală”, “școlar” or their derivatives.</p> <ul style="list-style-type: none"> - A company name including words like “național”, “român”, “institut” or their derivatives or words or phrases characteristic of the central or local public institutions or authorities may be used only with the approval of the General Secretariat of the Government or the Prefect. Such certificate is valid for a period of 3 months. <p><i>Agency: Trade Registry Office</i></p>	Less than one day (online procedure)	RON 72
2	<p>Deposit funds in a bank and obtain a document confirming bank deposit of sufficient funds</p> <p>The company's administrator or an authorized person must deliver certified copies of: (i) the name availability certificate, (ii) Articles of Incorporation, (iii) proof of the registered offices and (iv) the power of attorney (if applicable). After the documents are being reviewed by a bank's representative, the deposit is granted and the administrator/authorized person will receive a document confirming the</p>	1 day	no charge

No.	Procedure	Time to complete	Cost to complete
	<p>deposit of sufficient funds.</p> <p><i>Agency: Bank</i></p>		
<p>3</p>	<p>Company registration at the Trade Register Office</p> <p>In order to register at the Trade Register, the founders of the company shall have to prepare the articles of incorporation. Within 15 days from the establishment of the articles of incorporation, the founders or their mandates shall be under the obligation to register the company at the trade register in the area of the company's registered office. The articles of incorporation shall include, inter alia, the amount of the capital, which shall be fully subscribed by the founders.</p> <p>The trade register office also obtains electronically the fiscal record certificates.</p> <p>Registration at the trade register office is finalized by issuance of the certificate of incorporation ensures the following:</p> <ul style="list-style-type: none"> - company incorporation - fiscal registration (for profit, wages, health, pensions, unemployment taxes) by obtaining the unique registration code from the Ministry of Public Finance - authorization, based on statements of own responsibility, in the field of food safety and sanitary-veterinary protection, environment protection and labor protection - publication in the Official Gazette of Romania as legal publicity. <p>Registration for VAT purposes is made at the Fiscal Administration Authority directly.</p> <p>Based on Government Emergency Ordinance no. 116/2009 instituting certain measures regarding the activity of registration in the trade register, in order to simplify the registration procedures, the final approval for incorporation is no longer given by a delegated judge, but by the director or the appointed person of the territorial trade register office in the county where the company is incorporated, Bucharest in our case study.</p> <p>Cost details: RON 580.50 = (RON 250 registration fee + 50% liquidation fund fee and 5% insolvency bulletin fee) + RON 31.50 for publication in the Official Gazette of Romania + RON 100 per partner for the fiscal record certificate (20 per partner for the fiscal record certificate) + RON 45 for filling with the Trade Registry ("ascertaining certificate") + 4 (fiscal stamp fee).</p> <p><i>Agency: Trade Registry Office</i></p>	<p>3 days</p>	<p>see procedure details</p>
<p>4</p>	<p>Register for VAT</p> <p>A person subject to taxation established in Romania and has or intends to have an economic activity which implies operations that can be taxed and/or exempted from VAT with deduction rights, must request the</p>	<p>3 days</p>	<p>no charge</p>

No.	Procedure	Time to complete	Cost to complete
	<p>registration for VAT purpose from the qualified fiscal authority. The registration code for VAT purpose has the RO prefix, in concordance with the International Standard ISO 3166 - alpha 2 and is obtained in 3 days from the moment the documentation is submitted. The company which requests the registration for VAT purpose must submit to the competent fiscal authority the application in the same day with the submission of the file related to the incorporation of the company.</p> <p>In order to be registered for VAT purpose the company must submit to the competent fiscal authority the Registration Form 098. In addition to this, Tax Registration Form 010 must be submitted to the Ministry of Finance within the next 30 days as from the company's registration in order for the new company to register as profit tax and social contributions payer. In some cases the 3 days registration term provided by law is not observed.</p> <p><i>Agency: Ministry of Public Finance</i></p>		
5	<p>Register the employees contracts with the Territorial Labor Inspectorate (TLI) online</p> <p>Each employer shall be under the obligation to settle an internal general register record of all of his employees, in electronic format, which shall be transmitted to the Territorial Labour Inspectorate in the jurisdiction the employer has its registered office or domicile.</p> <p>The registration of the employees' labor contract can be done online, after a representative of the employer obtains a password for operating the online registry from the Territorial Labour inspectorate. This is based on the Government Decision 500/2011 on the general register of employees record, applicable starting with May 27, 2011.</p> <p><i>Agency: Territorial labor inspectorate</i></p>	Less than one day (online procedure)	no charge

* Takes place simultaneously with another procedure.

Note: Online procedures account for 0.5 days in the total time calculation.

DEALING WITH CONSTRUCTION PERMITS

Regulation of construction is critical to protect the public. But it needs to be efficient, to avoid excessive constraints on a sector that plays an important part in every economy. Where complying with building regulations is excessively costly in time and money, many builders opt out. They may pay bribes to pass inspections or simply build illegally, leading to hazardous construction that puts public safety at risk. Where compliance is simple, straightforward and inexpensive, everyone is better off.

What do the indicators cover?

Doing Business records the procedures, time and cost for a business in the construction industry to obtain all the necessary approvals to build a warehouse in the economy's largest business city, connect it to basic utilities and register the warehouse so that it can be used as collateral or transferred to another entity.

The ranking of economies on the ease of dealing with construction permits is determined by sorting their distance to frontier scores for dealing with construction permits. These scores are the simple average of the distance to frontier scores for each of the component indicators.

To make the data comparable across economies, *Doing Business* uses several assumptions about the business and the warehouse, including the utility connections.

The business:

- Is a limited liability company operating in the construction business and located in the largest business city. For the 11 economies with a population of more than 100 million, data for a second city have been added. Is domestically owned and operated.
- Has 60 builders and other employees.

The warehouse:

- Is valued at 50 times income per capita.
- Is a new construction (there was no previous construction on the land).

WHAT THE DEALING WITH CONSTRUCTION PERMITS INDICATORS MEASURE

Procedures to legally build a warehouse (number)

Submitting all relevant documents and obtaining all necessary clearances, licenses, permits and certificates

Submitting all required notifications and receiving all necessary inspections

Obtaining utility connections for water and sewerage

Registering the warehouse after its completion (if required for use as collateral or for transfer of the warehouse)

Time required to complete each procedure (calendar days)

Does not include time spent gathering information

Each procedure starts on a separate day. Procedures that can be fully completed online are recorded as ½ day.

Procedure considered completed once final document is received

No prior contact with officials

Cost required to complete each procedure (% of warehouse value)

Official costs only, no bribes

- Will have complete architectural and technical plans prepared by a licensed architect or engineer.
- Will be connected to water and sewerage (sewage system, septic tank or their equivalent). The connection to each utility network will be 150 meters (492 feet) long.
- Will be used for general storage, such as of books or stationery (not for goods requiring special conditions).
- Will take 30 weeks to construct (excluding all delays due to administrative and regulatory requirements).

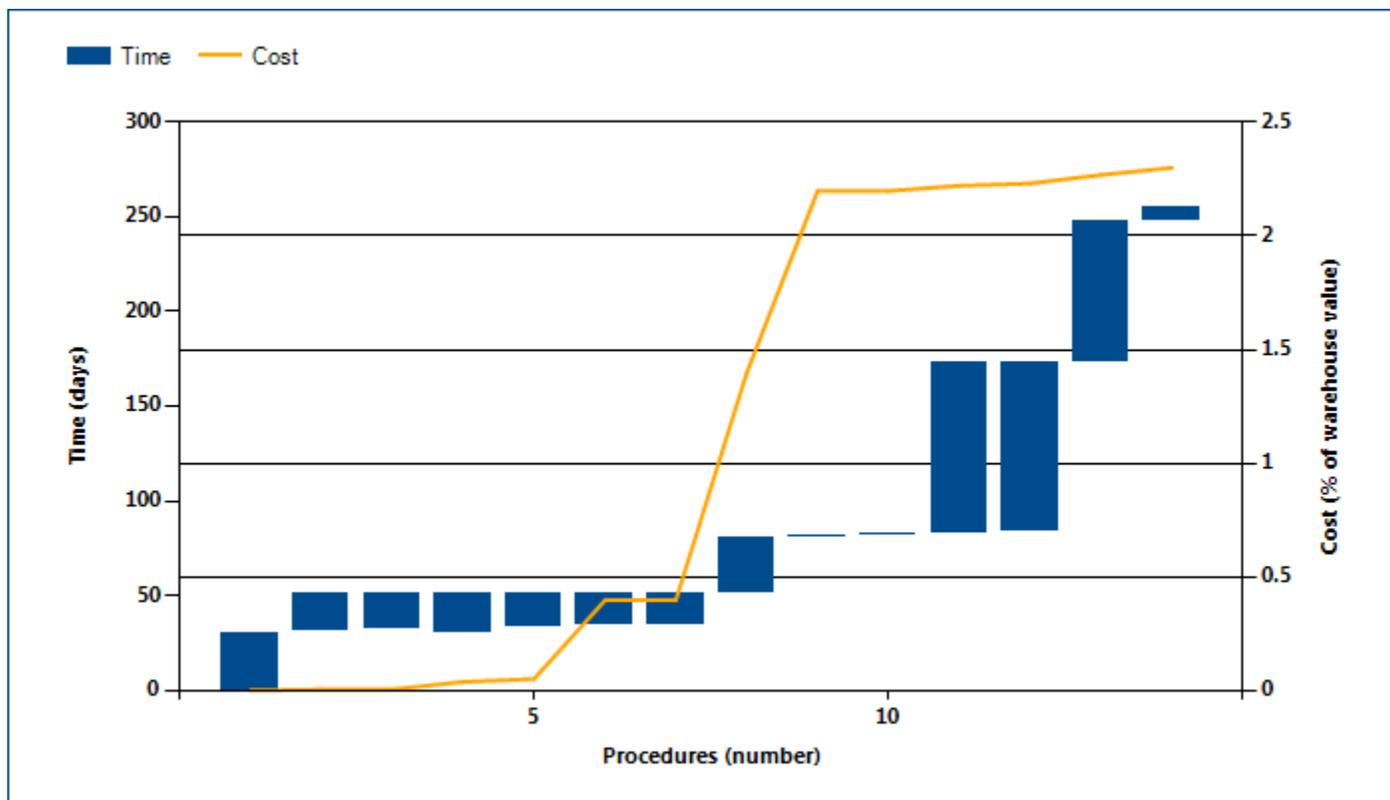

DEALING WITH CONSTRUCTION PERMITS

Where does the economy stand today?

What does it take to comply with the formalities to build a warehouse in Romania? According to data collected by *Doing Business*, dealing with construction permits there requires 14.0 procedures, takes 255.0 days and costs 2.3% of the warehouse value (figure 3.1). Most indicator sets refer to a case scenario in the largest business city of

an economy, except for 11 economies for which the data are a population-weighted average of the 2 largest business cities. See the chapter on distance to frontier and ease of doing business ranking at the end of this profile for more details.

Figure 3.1 What it takes to comply with formalities to build a warehouse in Romania -

Note: Time shown in the figure above may not reflect simultaneity of procedures. Online procedures account for 0.5 days in the total time calculation. For more information on the methodology of the dealing with construction permits indicators, see the *Doing Business* website (<http://www.doingbusiness.org>). For details on the procedures reflected here, see the summary at the end of this chapter.

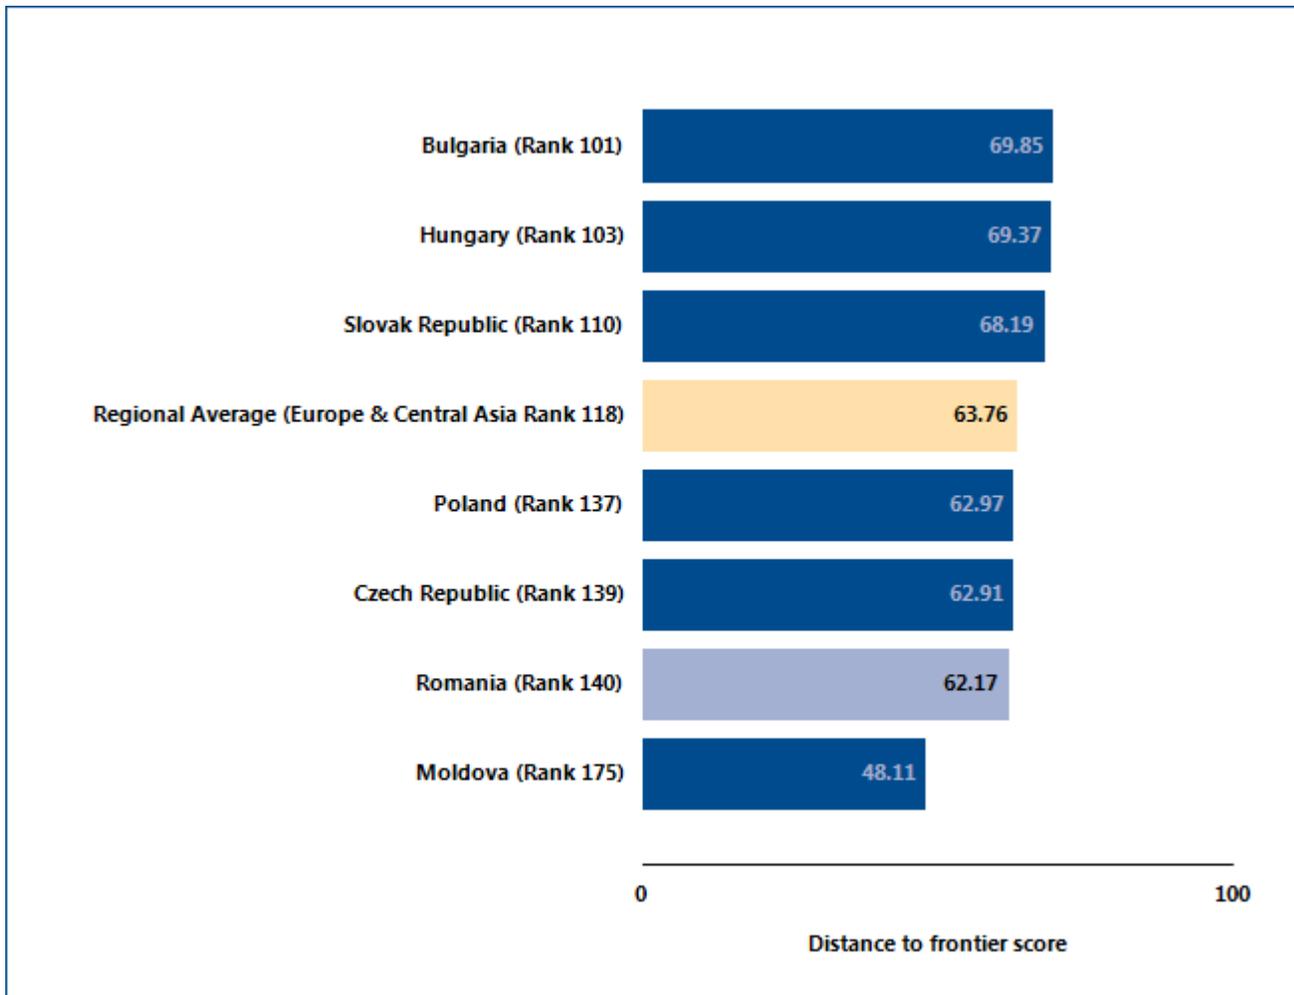

Source: *Doing Business* database.

DEALING WITH CONSTRUCTION PERMITS

Globally, Romania stands at 140 in the ranking of 189 economies on the ease of dealing with construction permits (figure 3.2). The rankings for comparator

economies and the regional average ranking provide other useful information for assessing how easy it is for an entrepreneur in Romania to legally build a warehouse.

Figure 3.2 How Romania and comparator economies rank on the ease of dealing with construction permits

Source: Doing Business database.

DEALING WITH CONSTRUCTION PERMITS

Smart regulation ensures that standards are met while making compliance easy and accessible to all. Coherent and transparent rules, efficient processes and adequate allocation of resources are especially important in sectors where safety is at stake. Construction is one of them. In

an effort to ensure building safety while keeping compliance costs reasonable, governments around the world have worked on consolidating permitting requirements. What construction permitting reforms has *Doing Business* recorded in Romania (table 3.1)?

Table 3.1 How has Romania made dealing with construction permits easier—or not?

By *Doing Business* report year from DB2010 to DB2015

DB year	Reform
DB2010	Romania made dealing with construction permits more costly by introducing a new fee.
DB2011	Romania amended regulations related to construction permitting to reduce fees and expedite the process.

Note: For information on reforms in earlier years (back to DB2006), see the *Doing Business* reports for these years, available at <http://www.doingbusiness.org>.

Source: *Doing Business* database.

DEALING WITH CONSTRUCTION PERMITS

What are the details?

The indicators reported here for Romania are based on a set of specific procedures—the steps that a company must complete to legally build a warehouse—identified by *Doing Business* through information collected from experts in construction licensing, including architects, civil engineers, construction lawyers, construction firms, utility service providers and public officials who deal with building regulations. These procedures are those that apply to a company and structure matching the standard assumptions used by *Doing Business* in collecting the data (see the section in this chapter on what the indicators cover).

BUILDING A WAREHOUSE

Estimated cost of construction : **RON 1,532,342**

City : **Bucharest**

The procedures, along with the associated time and cost, are summarized below.

Table 3.2 Summary of time, cost and procedures for dealing with construction permits in Romania -

No.	Procedure	Time to complete	Cost to complete
1	<p>Obtain urban planning certificate</p> <p>Pursuant to Order No. 839/2009 issued by the Ministry of Regional Development and Housing (“Order 839”), approving the Methodological Norms to the Construction Law, the following urban planning documents are required:</p> <ul style="list-style-type: none"> • The general urban plan (PUG) and the related local regulation • The (zone) urban plan (PUZ) and the related local regulation • The detailed urban plan (PUD) <p>The urban planning certificate provides information on the ownership, the public utility service availability, the location within (intravilan) and outside (extravilan) the city limits, the urban planning requirements, the land use at the time, the allowed uses, and so forth.</p> <p>From a technical point of view, the certificate shows the percentage of land occupation, the coefficient of land use, the minimum and maximum dimensions of the plots, the allowed built-up area, utilities, and access, necessary parking, alignment of the land and buildings with the adjacent streets, and the maximum and minimum construction height allowed.</p> <p>This certificate does not grant the right to build. Its validity period varies but cannot exceed 12 months. Construction must start during that 12-month period.</p> <p>The urban planning certificate enumerates all the necessary project clearances applicable to the warehouse case considered here. The municipality has the right to decide which project clearances are needed.</p> <p><i>Agency: Department of Urbanism of the local City Hall</i></p>	30 days	RON 17

No.	Procedure	Time to complete	Cost to complete
2	<p>Obtain project clearance from water supply and sewerage authority (Apa Nova SA)</p> <p>By law, the project clearance from the water supply and sewerage authority (Apa Nova S.A.) must be issued within 15 days, but in practice, it can take up to 18 days.</p> <p><i>Agency: Apa Nova SA</i></p>	18 days	RON 72
3	<p>* Obtain project clearance from General Inspectorate for Emergency Situations</p> <p>The relevant legal provisions in force are the Methodological Norms for the Endorsement and Permitting regarding Fire Security and Civil Protection, approved by Order No. 80/2009 of the Ministry of Administration and Interior.</p> <p>According to the amendments to the Construction Law, if the 15-day term provided by the law for issuing the clearance is not observed by the General Inspectorate for Emergency Situations, the legal provisions referring to tacit approval shall be applied.</p> <p><i>Agency: General Inspectorate for Emergency Situations</i></p>	15 days	no charge
4	<p>* Obtain project clearance from Bucharest Regional Environmental Protection Agency</p> <p>By law, the legal time limit for this procedure is 10 days, and the associated cost is RON 100.00. However, according to public authorities, the time to complete the procedure in practice is 21 days, and the cost can be up to RON 500.00.</p> <p><i>Agency: Bucharest Regional Environmental Protection Agency</i></p>	21 days	RON 500
5	<p>* Obtain project clearance from Health Department</p> <p>By law, the time to complete this procedure is 15 days. To apply for approval at the Bucharest Health Department, several documents must be submitted:</p> <ul style="list-style-type: none"> - urbanism certificate with annexed plans - technical memorandum drafted by the architect - ownership title - incorporation certificate <p><i>Agency: Bucharest Health Department</i></p>	15 days	RON 200
6	<p>* Sign contract with the solid waste authority (REBU SA)</p> <p>Through the certificate of urbanization the municipality requests that a contract be signed with a waste disposal company to clear construction debris from the construction site. There are two companies that provide services in this area: ROSAL S.A. and REBU S.A. The latter is a larger</p>	1 day	RON 5,292

No.	Procedure	Time to complete	Cost to complete
	<p>player with a wider network. The fees are RON 93 (RON 75.00 + 24% VAT) per cubic meter of waste (although VAT is not taken into account in the Doing Business case study). Additionally, for the surface of the land in question, a tax of RON 42.00 would also be applicable. The minimum of 35 cubic meters must be contracted according to the requirements of company.</p> <p><i>Agency: REBU SA</i></p>		
7	<p>* Notarize statement about nonexistence of land disputes</p> <p>The company must notarize a statement (in this case, BuildCo is both the company and the applicant) stating that there are no disputes related to the land. This procedure is not a standard requirement by law but is often requested in practice.</p> <p>Each notary charges a different fee, but the fee cannot exceed RON 30.00 (equivalent to USD 10.00), the maximum notary fee established by the National Notaries Union.</p> <p><i>Agency: Notary</i></p>	1 day	RON 15
8	<p>Obtain building permit</p> <p>BuildCo must apply for a building permit by submitting the following documents:</p> <ul style="list-style-type: none"> • City-planning certificate • Property title on the land (there are no requirements as to how recent the title must be) • Technical documentation which replaced former plans for the authorization of construction • Necessary approvals, as required by the city-planning certificate • Environmental approval • Proof of payment of the legally required taxes (receipts from the tax authorities) • Legalized copy of the title to the real estate or the updated cadastral plan and land registry extract for informative purposes <p>The building permit is issued by the City Hall. For Bucharest, the construction permit is issued by the General Mayor of Bucharest if the construction is outside the buildable area or if it exceeds a district area; or by the relevant district mayor if the construction is located in one of the six districts of Bucharest.</p> <p>The cost of the building permit is 1% of the value of the construction work.</p> <p><i>Agency: City Hall</i></p>	30 days	RON 15,323

No.	Procedure	Time to complete	Cost to complete
9	<p>Receive foundations work inspection</p> <p>The schedule of inspections is described in the building permit. By law, BuildCo must pay 0.1% of the authorized value to the competent territorial inspectorate for construction. In addition, the investors or owners must pay the State Inspectorate for Construction a monthly payment equivalent to 0.70% of the value of the expenses incurred in that month for the execution of the construction work.</p> <p><i>Agency: Bucharest Construction Inspectorate</i></p>	1 day	RON 12,259
10	<p>Receive frame inspection</p> <p>The examination of the building is performed in all cases through inspection of the building and by analyzing the documents contained in the technical book of the construction.</p> <p><i>Agency: State Inspectorate for Construction</i></p>	1 day	no charge
11	<p>Obtain final assessment of the construction from the Acceptance Commission</p> <p>BuildCo notifies the local public administration and other relevant authorities of the date of completion of construction so that the Acceptance Commission may be convened. The Acceptance Commission is a body made up of the construction beneficiary (BuildCo), officials from local public administration, and technical experts. It is legally required to meet and determine that the construction meets all applicable legal requirements.</p> <p>The Commission must be convened within 15 days from the date of completion of works. The utility connections would have been made at this stage. The final assessment can take several days and includes an on-site inspection. Within 3 working days from the end of the assessment, the Acceptance Commission must submit the notes and conclusions to the beneficiary of construction and recommend approval (with or without reservations), postponement, or rejection of the construction.</p> <p><i>Agency: Acceptance Commission</i></p>	90 days	RON 350
12	<p>* Receive final inspection from the Acceptance Commission</p> <p><i>Agency: Acceptance Commission</i></p>	1 day	RON 150

No.	Procedure	Time to complete	Cost to complete
13	<p>Obtain water and sewage connection (Apa Nova SA)</p> <p>According to the water and sewage authority (Apa Nova S.A.), this procedure takes approximately 2 -- 3 months due to a significant increase in demand and backlog. The associated costs were increased to RON 520.00 for connection fee, RON 62.00 for application fee and 64.18% VAT (VAT is not taken into account in the Doing Business case study). Inspections for utilities occur at the same time as the connection.</p> <p><i>Agency: Apa Nova SA</i></p>	75 days	RON 582
14	<p>Register the building with the Real Estate Registry</p> <p>The building can be registered once it has been completed and approved. There are two stages of approval, and for that reason, the building can be registered twice. The first stage is after the Acceptance Commission, and the second is when the warranty period has expired, after the approval by the Acceptance Commission. The second approval applies only when the owner and the builder are different entities. Therefore, in the case considered here, it is assumed that only one registration is done.</p> <p>Pursuant to Order No. 186/2009 on the establishment of time frames for performing services by the National Agency for Cadastre and Land Registration ("Order 186"), the standard registration time is 21 days but, if the applicant pays an additional fee, the registration time will be reduced to 7 days. According to Order No. 39/2009 on the approval of fees for performing services by the National Agency for Cadastre and Land Registration ("Order 39"), the standard registration fee is RON 120 and the fast-track fee is 4-times the standard fee.</p> <p><i>Agency: Real Estate Registry</i></p>	7 days	RON 480

* Takes place simultaneously with another procedure.

Note: Online procedures account for 0.5 days in the total time calculation.

Source: *Doing Business* database.

GETTING ELECTRICITY

Access to reliable and affordable electricity is vital for businesses. To counter weak electricity supply, many firms in developing economies have to rely on self-supply, often at a prohibitively high cost. Whether electricity is reliably available or not, the first step for a customer is always to gain access by obtaining a connection.

What do the indicators cover?

Doing Business records all procedures required for a local business to obtain a permanent electricity connection and supply for a standardized warehouse, as well as the time and cost to complete them. These procedures include applications and contracts with electricity utilities, clearances from other agencies and the external and final connection works. The ranking of economies on the ease of getting electricity is determined by sorting their distance to frontier scores for getting electricity. These scores are the simple average of the distance to frontier scores for each of the component indicators. To make the data comparable across economies, several assumptions are used.

The warehouse:

- Is owned by a local entrepreneur, located in the economy's largest business city, in an area where other warehouses are located. For the 11 economies with a population of more than 100 million, data for a second city have been added.
- Is not in a special economic zone where the connection would be eligible for subsidization or faster service.
- Is located in an area with no physical constraints (ie. property not near a railway).
- Is a new construction being connected to electricity for the first time.
- Is 2 stories, both above ground, with a total surface of about 1,300.6 square meters (14,000 square feet), is built on a plot of 929 square meters (10,000 square feet), is used for storage of refrigerated goods

The electricity connection:

- Is 150 meters long and is a 3-phase, 4-wire Y, 140-kilovolt-ampere (kVA) (subscribed capacity) connection.

WHAT THE GETTING ELECTRICITY INDICATORS MEASURE

Procedures to obtain an electricity connection (number)

- Submitting all relevant documents and obtaining all necessary clearances and permits
- Completing all required notifications and receiving all necessary inspections
- Obtaining external installation works and possibly purchasing material for these works
- Concluding any necessary supply contract and obtaining final supply

Time required to complete each procedure (calendar days)

- Is at least 1 calendar day
- Each procedure starts on a separate day
- Does not include time spent gathering information
- Reflects the time spent in practice, with little follow-up and no prior contact with officials

Cost required to complete each procedure (% of income per capita)

- Official costs only, no bribes
- Excludes value added tax
- Is to either the low-voltage or the medium-voltage distribution network and either overhead or underground, whichever is more common in the area where the warehouse is located. Included only negligible length in the customer's private domain.
- Requires crossing of a 10-meter road but all the works are carried out in a public land, so there is no crossing into other people's private property.
- Involves installing one electricity meter. The monthly electricity consumption will be 26880 kilowatt hour (kWh). The internal electrical wiring has been completed.

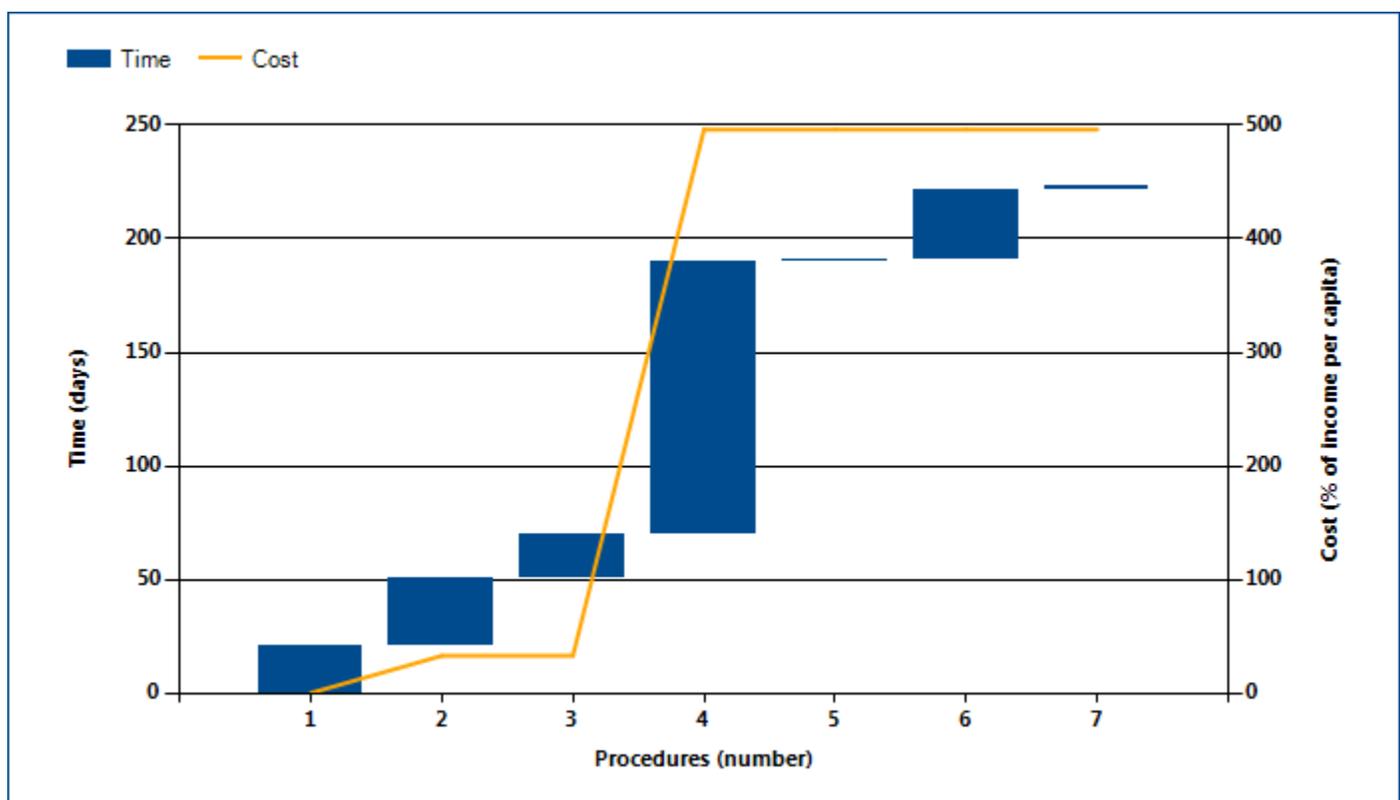

GETTING ELECTRICITY

Where does the economy stand today?

What does it take to obtain a new electricity connection in Romania? According to data collected by *Doing Business*, getting electricity there requires 7.0 procedures, takes 223.0 days and costs 496.1% of income per capita (figure 4.1).

Most indicator sets refer to a case scenario in the largest business city of an economy, except for 11 economies for which the data are a population-weighted average of the 2 largest business cities. See the chapter on distance to frontier and ease of doing business ranking at the end of this profile for more details.

Figure 4.1 What it takes to obtain an electricity connection in Romania -

Note: Time shown in the figure above may not reflect simultaneity of procedures. For more information on the methodology of the getting electricity indicators, see the *Doing Business* website (<http://www.doingbusiness.org>). For details on the procedures reflected here, see the summary at the end of this chapter.

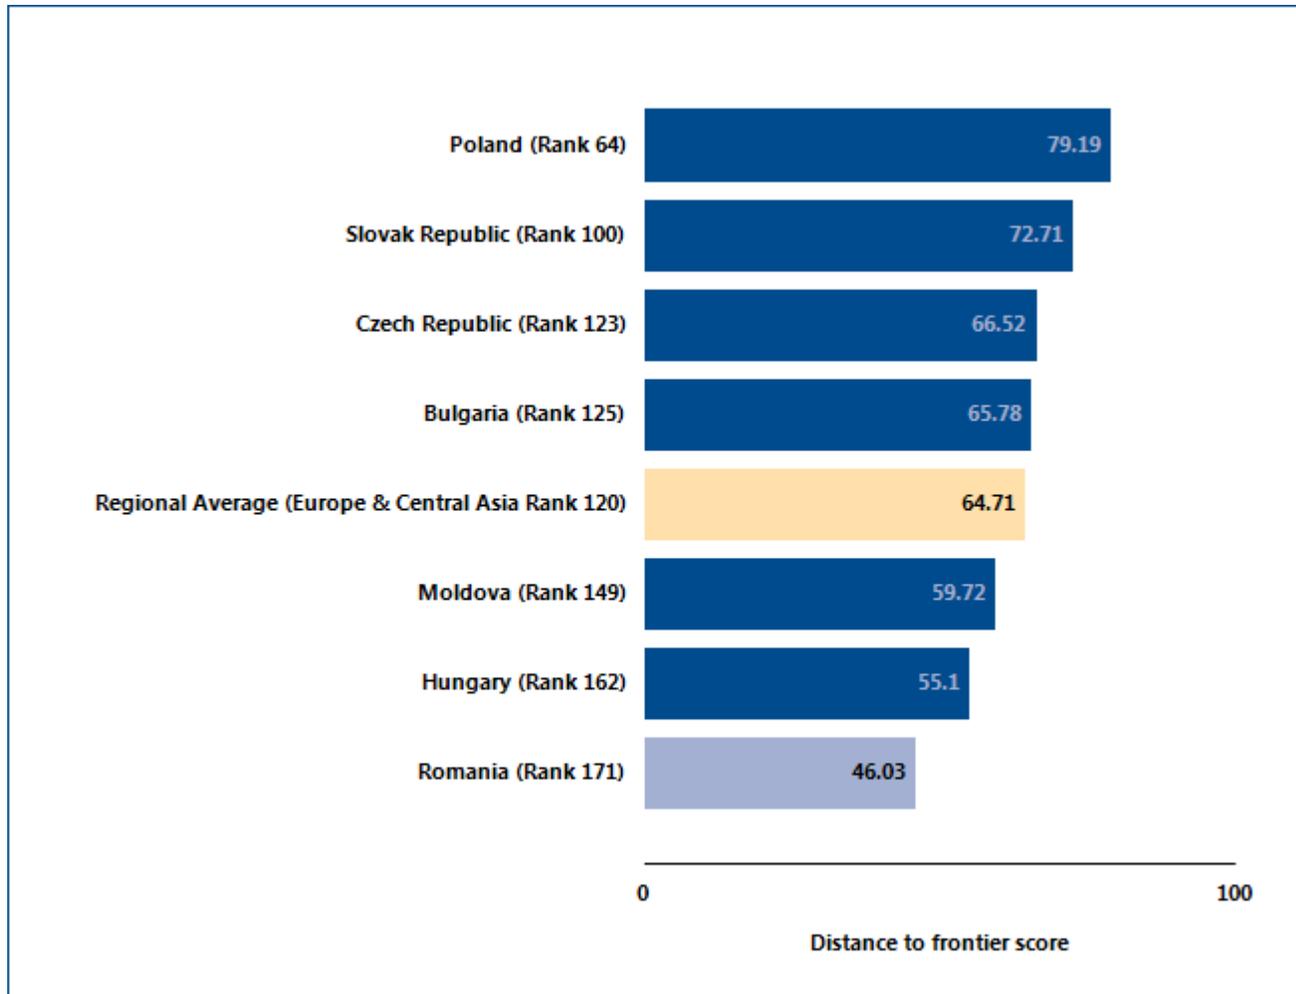

Source: *Doing Business* database.

GETTING ELECTRICITY

Globally, Romania stands at 171 in the ranking of 189 economies on the ease of getting electricity (figure 4.2). The rankings for comparator economies and the regional

average ranking provide another perspective in assessing how easy it is for an entrepreneur in Romania to connect a warehouse to electricity.

Figure 4.2 How Romania and comparator economies rank on the ease of getting electricity

Source: Doing Business database.

GETTING ELECTRICITY

What are the details?

The indicators reported here for Romania are based on a set of specific procedures—the steps that an entrepreneur must complete to get a warehouse connected to electricity by the local distribution utility—identified by *Doing Business*. Data are collected from the distribution utility, then completed and verified by electricity regulatory agencies and independent professionals such as electrical engineers, electrical contractors and construction companies. The electricity distribution utility surveyed is the one serving the area (or areas) in which warehouses are located. If there is a choice of distribution utilities, the one serving the largest number of customers is selected.

OBTAINING AN ELECTRICITY CONNECTION

Name of utility: ENEL Distributie Muntenia

City: Bucharest

The procedures are those that apply to a warehouse and electricity connection matching the standard assumptions used by *Doing Business* in collecting the data (see the section in this chapter on what the indicators cover). The procedures, along with the associated time and cost, are summarized below.

Table 4.2 Summary of time, cost and procedures for getting electricity in Romania -

No.	Procedure	Time to complete	Cost to complete
1	<p>Submit application with ENEL and await letter and technical conditions</p> <p>The customer submits the application with ENEL for technical conditions. In the answer, ENEL writes if the connection is confirmed or not and recommends doing a technical study.</p> <p><i>Agency: ENEL Distributie Muntenia</i></p>	21 calendar days	RON 128.6
2	<p>Hire electrical design firm to conduct a technical study and get study approved by ENEL</p> <p>The customer has to hire an electrical contractor that will do a technical study. The study could also be done by ENEL. The study will give the different technical options for the connection works. After the study is finished, the electrical contractor goes to ENEL with the study to get the best technical option approved. ENEL approves the best option and informs the customer about their choice.</p> <p><i>Agency: Electrical Contractor/ ENEL Distributie Muntenia</i></p>	30 calendar days	USD 2,969.57
3	<p>Submit documents for conclusion of connection contract, receive contract</p> <p>Once ENEL has approved the study, the customer gets the technical connection approval together with the proposal of connection contract. After the conclusion of the connection contract, the customer gets the estimate for the connection cost including the component related to the</p>	19 calendar days	RON 0

No.	Procedure	Time to complete	Cost to complete
	<p>cost of the connection installation (material and labor force), as well as the component corresponding to the work inspection and activation of the installations for use.</p> <p><i>Agency: ENEL Distributie Muntenia</i></p>		
4	<p>Obtain design of works, get design approved by ENEL and conclude execution contract with ENEL and await end of connection works carried out by electrical contractor</p> <p>The customer hires an electrical contractor (can also be the same firm as under procedure 2) to make the design of the connection. The design needs to be approved by ENEL. After the design has been approved, the customer goes to the municipality to pay 1% of the utility's invoice. This is the fee to obtain the construction permit that the customer has to submit for the connection works. The construction permit can be obtained by the electrical contractor on behalf of the customer. Depending on the municipality, 5-20 permits need to be obtained before at other agencies/stakeholders and then submitted to the municipality in order to obtain the construction permit for the connection works. At some municipalities, a geodesic assessment has to be submitted as part of the application package. After the construction permit has been obtained, ENEL concludes a contract (execution contract) with the electrical contractor (that was hired by the customer) and the works start. At the same time, the electrical contractor makes a file about the internal wiring of the warehouse that confirms that the internal wiring was done accordingly to safety standards. The customer pays the cost for the connection works directly to ENEL and not to the electrical contractor that he hired.</p> <p><i>Agency: Electrical Contractor</i></p>	120 calendar days	USD 41,943.5
5	<p>Receive final inspection of works by ENEL</p> <p>At the end of the works, ENEL comes to inspect the works. In the technical study (procedure 2), the whole time plan and different steps of the connection works are laid out. The electrical contractor has to call ENEL towards the end of the works and usually ENEL comes immediately to do the inspection.</p> <p><i>Agency: ENEL Distributie Muntenia</i></p>	1 calendar day	RON 0
6	<p>Submit internal wiring file, conclude use of land contract and receive connection certificate</p> <p>At the end of the works, the customer submits the internal wiring file to ENEL for verification. The customer has to go with a notary to ENEL to conclude a contract of "use of land" with ENEL. They have to meet the</p>	30 calendar days	RON 0

No.	Procedure	Time to complete	Cost to complete
	<p>director responsible for the grid. This contract is stating that the land is in use by ENEL, but not owned by ENEL. Without this contract, there would be no connection. A connection certificate is also issued by ENEL.</p> <p><i>Agency: ENEL Distributie Muntenia</i></p>		
7	<p>Supply contract and receive meter installation by ENEL</p> <p>The customer concludes the supply contract with ENEL. 48 hours after the signature of the contract, ENEL comes to the warehouse to install the meter and electricity starts flowing. When the connection to the network is done, the overall grid in the neighborhood needs to be interrupted. This is announced in the newspaper. There is no waiting time.</p> <p><i>Agency: ENEL Distributie Muntenia</i></p>	2 calendar days	RON 0

* Takes place simultaneously with another procedure.

REGISTERING PROPERTY

Ensuring formal property rights is fundamental. Effective administration of land is part of that. If formal property transfer is too costly or complicated, formal titles might go informal again. And where property is informal or poorly administered, it has little chance of being accepted as collateral for loans—limiting access to finance.

What do the indicators cover?

Doing Business records the full sequence of procedures necessary for a business to purchase property from another business and transfer the property title to the buyer's name. The transaction is considered complete when it is opposable to third parties and when the buyer can use the property, use it as collateral for a bank loan or resell it. The ranking of economies on the ease of registering property is determined by sorting their distance to frontier scores for registering property. These scores are the simple average of the distance to frontier scores for each of the component indicators. To make the data comparable across economies, several assumptions about the parties to the transaction, the property and the procedures are used.

The parties (buyer and seller):

- Are limited liability companies, 100% domestically and privately owned and perform general commercial activities.
- Are located in the economy's largest business city².
- Have 50 employees each, all of whom are nationals.

The property (fully owned by the seller):

- Has a value of 50 times income per capita. The sale price equals the value.
- Is registered in the land registry or cadastral, or both, and is free of title disputes.
- Property will be transferred in its entirety.

WHAT THE REGISTERING PROPERTY INDICATORS MEASURE

Procedures to legally transfer title on immovable property (number)

Preregistration (for example, checking for liens, notarizing sales agreement, paying property transfer taxes)

Registration in the economy's largest business city²

Postregistration (for example, filing title with the municipality)

Time required to complete each procedure (calendar days)

Does not include time spent gathering information

Each procedure starts on a separate day. Procedures that can be fully completed online are recorded as ½ day.

Procedure considered completed once final document is received

No prior contact with officials

Cost required to complete each procedure (% of property value)

Official costs only, no bribes

No value added or capital gains taxes included

- Is located in a periurban commercial zone, and no rezoning is required.
- Has no mortgages attached, has been under the same ownership for the past 10 years.
- Consists of 557.4 square meters (6,000 square feet) of land and a 10-year-old, 2-story warehouse of 929 square meters (10,000 square feet). The warehouse is in good condition and complies with all safety standards, building codes and legal requirements. There is no heating system.

² For the 11 economies with a population of more than 100 million, data for a second city have been added.

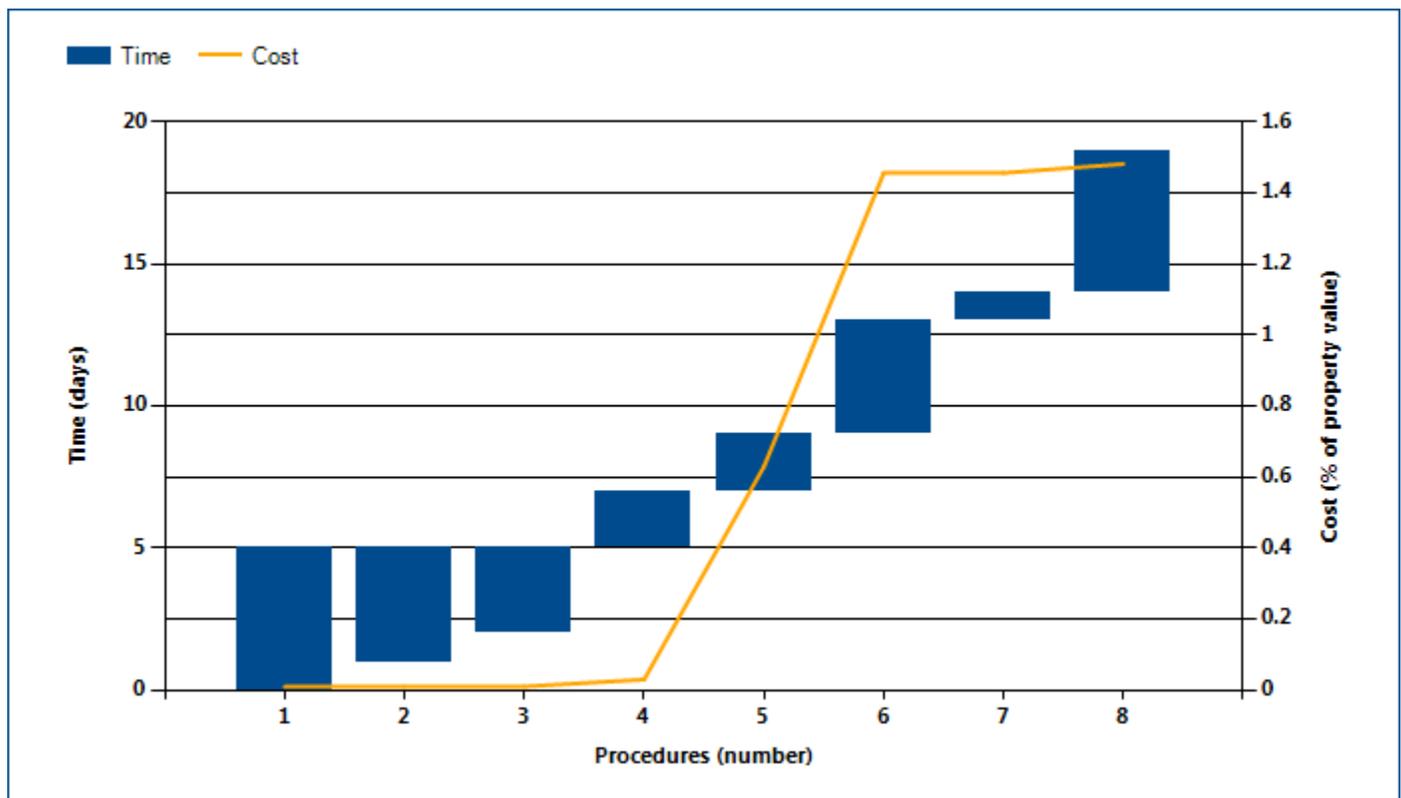

REGISTERING PROPERTY

Where does the economy stand today?

What does it take to complete a property transfer in Romania? According to data collected by *Doing Business*, registering property there requires 8.0 procedures, takes 19.0 days and costs 1.5% of the property value (figure 5.1).

Most indicator sets refer to a case scenario in the largest business city of an economy, except for 11 economies for which the data are a population-weighted average of the 2 largest business cities. See the chapter on distance to frontier and ease of doing business ranking at the end of this profile for more details.

Figure 5.1 What it takes to register property in Romania -

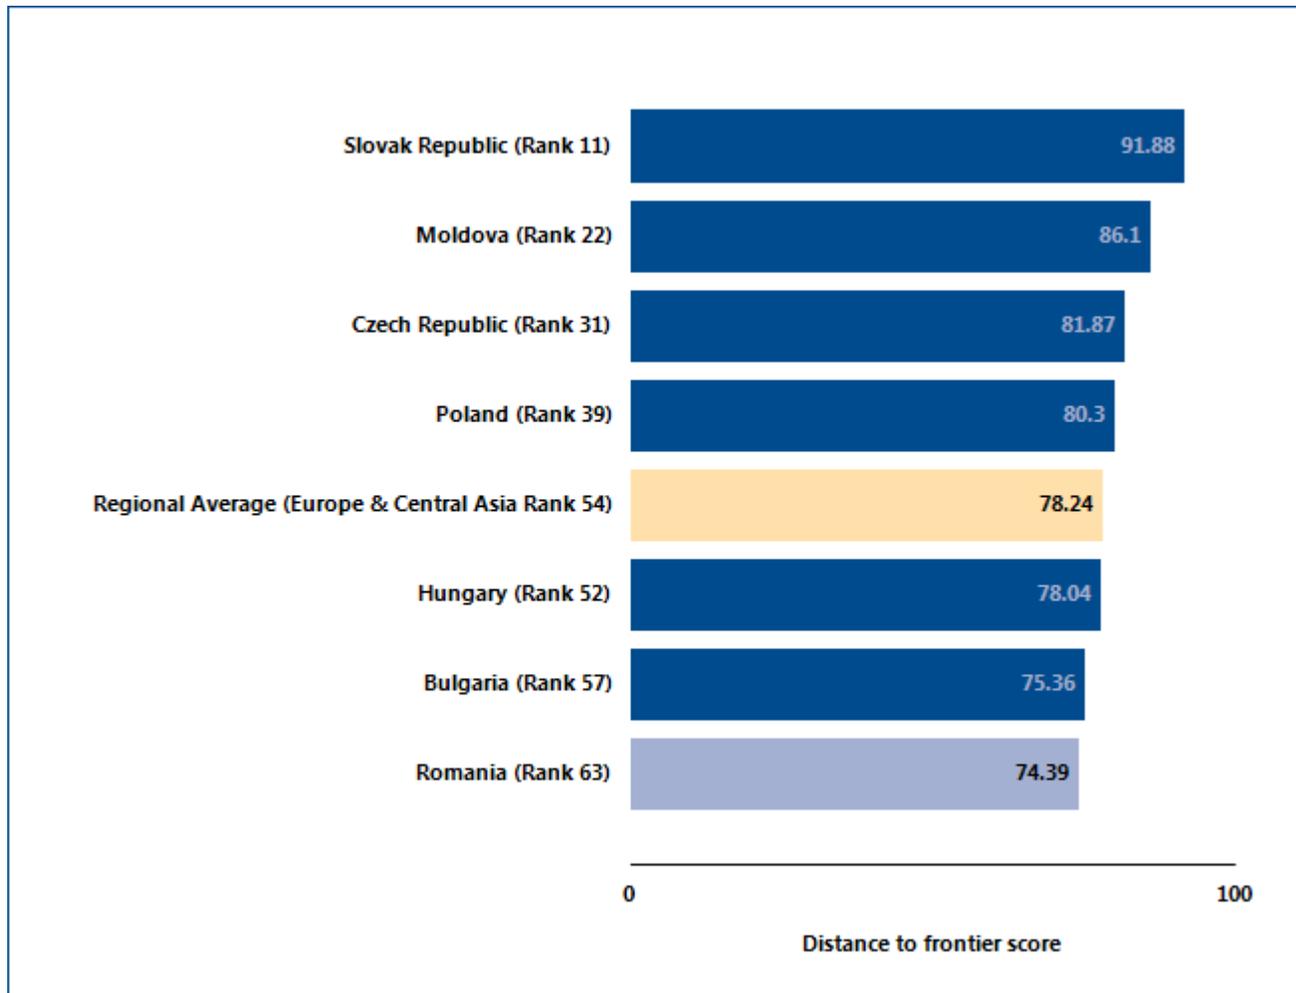

Note: Time shown in the figure above may not reflect simultaneity of procedures. Online procedures account for 0.5 days in the total time calculation. For more information on the methodology of the registering property indicators, see the *Doing Business* website (<http://www.doingbusiness.org>). For details on the procedures reflected here, see the summary at the end of this chapter. Source: *Doing Business* database.

REGISTERING PROPERTY

Globally, Romania stands at 63 in the ranking of 189 economies on the ease of registering property (figure 5.2). The rankings for comparator economies and the

regional average ranking provide other useful information for assessing how easy it is for an entrepreneur in Romania to transfer property.

Figure 5.2 How Romania and comparator economies rank on the ease of registering property

Source: Doing Business database.

REGISTERING PROPERTY

Economies worldwide have been making it easier for entrepreneurs to register and transfer property—such as by computerizing land registries, introducing time limits for procedures and setting low fixed fees. Many have cut

the time required substantially—enabling buyers to use or mortgage their property earlier. What property registration reforms has *Doing Business* recorded in Romania (table 5.1)?

Table 5.1 How has Romania made registering property easier—or not?

By *Doing Business* report year from DB2010 to DB2015

DB year	Reform
DB2010	Romania speeded up property registration by introducing expedited procedures at the land registry and the cadastre.

Note: For information on reforms in earlier years (back to DB2005), see the *Doing Business* reports for these years, available at <http://www.doingbusiness.org>.

Source: *Doing Business* database.

REGISTERING PROPERTY

What are the details?

The indicators reported here are based on a set of specific procedures—the steps that a buyer and seller must complete to transfer the property to the buyer’s name—identified by *Doing Business* through information collected from local property lawyers, notaries and property registries. These procedures are those that apply to a transaction matching the standard assumptions used by *Doing Business* in collecting the data (see the section in this chapter on what the indicators cover).

STANDARD PROPERTY TRANSFER

Property value: RON 1,532,342

City: Bucharest

The procedures, along with the associated time and cost, are summarized below.

Table 5.2 Summary of time, cost and procedures for registering property in Romania

No.	Procedure	Time to complete	Cost to complete
1	<p>Obtain information from the Cadastre</p> <p>The seller obtains information drafted by an authorized expert from the Cadastre and Real Estate Publicity Office. This information includes: technical memorials, coordination inventory, analytical calculation of the land, topographical description, area plan on a scale of 1:500; and on the scale of 1:2000, description of property, the plan of the real estate, and a property statement regarding the identification of the limits of the measured real estate. The documentation shall include: • Application form • A copy of the property title • A copy of the identification documents of the owner Order no. 186/2009 provides the deadlines for obtaining technical information from the Cadastre which differ by taking into account the relevant requested document and vary between three (3) days and seven (7) days in the normal Procedure and one (1) day and two (2) days in the expedited Procedure. Order no. 39/2009 provides the relevant taxes to be paid which also vary from RON 15/hour to RON 30/sheet or even RON 150 for certain technical data. Order no. 371/2007 was repealed by Order no. 39/2009, starting with April 16, 2009, with its subsequent amendments. In addition, any document having a public character (e.g., location layouts, cadastral data) can be obtained by any person and not only by the owner of the property. Cost: 1. Consultation of archives on the spot - cost: 10 RON for 15 minutes. 2. Land Book information excerpt - cost: 20 RON per property. 3. Certified copies of documents from the document files and land books - cost: 5 RON per page. 4. Certificate for the identification of the topographic/cadastre number and land book number according to the name of the owner - cost: 100 RON per owner/land book office. 5. Cadastre plan excerpts - cost: 15 RON per property Time: 1. Consultation of archives on the spot - time: on the spot. 2. Land Book information excerpt - ordinary Procedure: 3 days; emergency Procedure: 1 day. 3. Certified copies of documents from the document files and land books - ordinary Procedure: 3 days; emergency Procedure: 1 day. 4. Certificate for the identification of the topographic/cadastr</p>	<p>Time: (simultaneous with Procedure 2 and 3)</p> <p>1. Consultation of archives on the spot - time: on the spot. 2. Land Book information excerpt - ordinary Procedure: 3 days; emergency Procedure: 1 day. 3. Certified copies of documents from the document files and land books - ordinary Procedure: 3 days; emergency Procedure: 1 day. 4. Certificate for the identification of the topographic/cadastr</p>	<p>"Cost: 1. Consultation of archives on the spot - cost: 10 RON for 15 minutes. 2. Land Book information excerpt - cost: 20 RON per property. 3. Certified copies of documents from the document files and land books - cost: 5 RON per page (3 pages). 4. Certificate for the identification of the topographic/cadastr number and land book number according to the name of the owner - cost: 100 RON per owner/land book office. 5. Cadastre plan excerpts - cost: 15 RON per property"</p>

No.	Procedure	Time to complete	Cost to complete
	<p>and land book number according to the name of the owner - ordinary Procedure: 7 days; emergency Procedure: 2 days. 5. Cadastre plan excerpts - ordinary Procedure: 5 days; emergency Procedure: 2 days.</p> <p><i>Agency: Cadastre and Real Estate Publicity Office</i></p>	<p>name of the owner - ordinary Procedure: 7 days; emergency Procedure: 2 days 5. Cadastre plan excerpts - ordinary Procedure: 5 days; emergency Procedure: 2 days.</p>	
<p>2</p>	<p>* Obtain a fiscal certificate from the direction for public taxes of the Municipality</p> <p>The Seller obtains a clearance certificate from the direction for public taxes of the Municipality from the district where the real estate is located attesting that the property is not owned by someone else and that there are no unpaid taxes. This fiscal certificate is required for completion of a transfer of ownership. The fiscal certificate is valid for up to 30 days for legal entities. According to the provisions of art. 113 of the Romanian Fiscal Procedure Code, the validity of a fiscal certificate lasts until the end of the month within which the certificate is issued. The documentation shall include: • An application from the owner • A copy of the last receipt with which it is demonstrated that there are no unpaid taxes • A copy of the identification documents of the owner • The last accounting records of the company • The power of attorney for the company's representative • Confirmation of payment of fiscal stamp</p> <p><i>Agency: Municipality</i></p>	<p>4 days (simultaneous with Procedure 1 and 3)</p>	<p>RON 4 (fiscal stamp)</p>
<p>3</p>	<p>* Obtain a fiscal certificate from Local fiscal authority</p> <p>The fiscal certificate obtained by the Seller represents a clearance attesting that there are no unpaid taxes and fees related to the real estate. The fiscal certificate requirement is mandatory for the valid transfer of the ownership rights over a real estate. The fiscal certificate is valid for up to 30 days. In order to obtain the certificate the following documents are required: 1. An application from the owner 3. Confirmation of payment of the fiscal stamp 2. A copy of the identification documents of the owner</p> <p><i>Agency: Local fiscal authority</i></p>	<p>3 days (simultaneous with Procedure 1 and 2)</p>	<p>RON 4 (fiscal stamp)</p>

No.	Procedure	Time to complete	Cost to complete
4	<p>Obtain a Land Registry extract (non-encumbrance certificate) from the Land Registry office</p> <p>For the notarization of the transfer deed of an immovable, the notary public requests an authentication excerpt from the Land Registry office where the immovable is registered. In this respect, the notary public submits to the relevant Land Registry office the application form signed and stamped by it and the owner of the immovable, along with the payment proof of the issuance fee. The authentication excerpt may only be obtained by a notary public. The validity of the authentication excerpt is of 10 business days, starting with the day when the request application form was registered. During the 10-business days validity period, the Land Registry office clerk is not entitled to register any other operation in the relevant Land Registry, save for the one for which the excerpt was required; the Land Registry is blocked during the aforementioned period, in order to ensure the security of the real estate transactions. However, if during the validity term, the notarial deed for which the excerpt was requested is submitted to the Cadastre and Real Estate Publicity Office for registration or if the notary public made an express request in this sense, the validity of the excerpt expires. The authentication excerpt can be obtained in 2 business days (regular Procedure, cost RON 40) or in 1 business day (expedited Procedure, cost RON 200). The information excerpt can be obtained in 3 business days (regular Procedure, cost RON 20) or in 1 day (expedited Procedure, cost RON 100).</p> <p><i>Agency: Cadastre and Real Estate Publicity Office</i></p>	<p>For the excerpt (requested by the notary public) the duration is of 2 business days (regular Procedure) and 1 business day (expedited Procedure) and for the information excerpt the duration is of 3 business days (regular Procedure) and 1 business day (expedited Procedure).</p>	<p>Authentication excerpt - 40 RON in regular Procedure, 200 RON in expedited Procedure; Information excerpt - 20 RON in regular Procedure, 100 RON in expedited Procedure</p>
5	<p>The notary authenticates the transfer deed</p> <p>The notary public verifies the fiscal certificate and the Land Registry excerpt and notarizes the sale purchase agreement. Without these documents, the notary public may not notarize the agreement. According to the actual legal provision, the sale purchase agreement shall be drafted only by the notary public. The costs related to the procedure could be paid either directly to the notary public, or via bank transfer. Though it is not mandatory, a lawyer may conduct a due diligence before this procedure, by perusing the previous successive transfers and owners of the property. The notary public is obliged to verify all encumbrances and relief measures instituted over the immovable to be sold in the public records and it is liable for the failure to specify in the notarial deed the encumbrances and the relief measures over the immovable - see also 2.1.3., above. The documentation for the notarization of the transfer deed includes, among others, the following:</p> <p>(i) the property title in original,</p> <p>(ii) the cadastral documents of the property (obtained in Procedure 1),</p> <p>(iii) the Fiscal certificate from the local taxes office (obtained in Procedure 3),</p>	<p>2 days</p>	<p>"RON 5,080 + 0,44%, of the transaction value exceeding RON 600,001 (notary fees) For transactions with the value of the transaction (in RON):</p> <ul style="list-style-type: none"> • Below RON 15,000 - the fee is 2,2% but no less than RON 150 • From RON 15,001 to RON 30,000 - the fee is RON 330 + 1,6% for the amount exceeding RON 15,001 • From RON 30,001 to RON 60,000 -

No.	Procedure	Time to complete	Cost to complete
	<p>(iv) identification certificates/documents for the signatory parties (identity cards, passports, registration certificates, etc),</p> <p>(v) documents attesting the capacity of the signatories to sign the sale purchase agreement (power of attorney, shareholders' decision, articles of incorporation, etc.).</p> <p>The Seller - legal entity has to pay an income tax of 16% applied on the profit resulted in the company's balance sheet, including this transaction.</p> <p><i>Agency: Notary Public</i></p>		<p>the fee is RON 580 + 1,3% for the amount exceeding RON 30,001 • From RON 60,001 to RON 300,000 - the fee is RON 970 + 0,9% for the amount exceeding RON 60,001 • From RON 300,001 to RON 600,000 - the fee is RON 3,130 + 0,65% for the amount exceeding RON 300,001 • Over RON 600,001 - the fee is RON 5,080 + 0,44% for the amount exceeding RON 600,001"</p>
6	<p>Register title in the Land Registry Office</p> <p>The same public notary applies for registration of the property title at the Land Book Office, by sending the application and the original notary deed, directly or by fax, to the district Land Book Office where the real estate is placed. Therefore, the registration is performed ex officio by the notary, based on the authenticated sale purchase act. An expedited option is available given that an extra fee of 4 times the normal fee will be added. The extra fee can not be more than RON 5,000. Registration fees are 0.5% of property value with a minimum of RON 60 according to Order no 39/06.04.2009, for a Procedure that takes 9 days. An expedited Procedure is available (3 days) for an additional fee of 2% of property value. According to the article 1 paragraph 6 of Order no 39/2009, this additional fee cannot exceed RON 5000. Only when the real estate is registered in the Land Book for the first time a tax of RON 120 should be paid for this registration. In case the owner registers his/her property for the first time (i.e. following the reconstitution of the ownership for which the cadastre is made for the first time) the terms for registration are 21 days (regular Procedure) or 7 days (expedited Procedure). The documentation shall include: • Sale-purchase contract (notarized in Procedure 4) • Fiscal certificate (obtained in Procedure 2) • Cadastre certificate (obtained in Procedure 1) • ID of the buyer • A registration application • The property title, all the originals, plus a legalized copy from a public notary • Proof of total payment</p> <p><i>Agency: Land Registry office</i></p>	<p>"Regular procedure - 9 business days (9-11 calendar days) Expedited procedure - 3 business days (3-4 calendar days)"</p>	<p>"0.5% of the property value without VAT (regular Procedure); 2% of the property value without VAT (expedited Procedure). Minimum cost RON 60. The extra fee paid for the expedited Procedure cannot exceed RON 5,000."</p>

No.	Procedure	Time to complete	Cost to complete
7	<p>File fiscal declaration of acquiring the property</p> <p>The fiscal declaration concerning the immovable acquisition should be filled in by the purchaser at the Local Tax Department within a 30-day term since the notarization of the transfer deed. The documentation shall include: tax statement for the immovable, the property title, in original and a copy, accounting documents (invoice, analytical balance, balance sheet, etc.), cadastral documents, copy of the registration certificate of the company.</p> <p><i>Agency: Local Tax Department</i></p>	1 day	RON 10
8	<p>Registration of the work place with the Trade Register Office</p> <p>The buyer should apply for registration with the Trade Register Office of the work place located at the newly acquired property. If the property is a working unit of the company, it has to be registered, as it is mentioned in the Commercial Registration Law (Law Number 26 1990). The registration includes, among others, environment, sanitary, fire protection, labor approvals from various relevant authorities, all located in a one-stop shop. The registration is not necessary for the transfer of title, but only for making it opposable to third parties and for registration as a place of business. The concrete use of the property as a work place is not required but the evidences necessary for using it as such are needed for obtaining the authorizations within the corporate registration process. Stamp tax and registration fees are lump-sum taxes and do not depend on the property value. The Trade Register tax and fees could be paid either directly to the Trade Register or through special bank accounts organized for such purposes. In summary, the total amount to be paid for the registration of a working place is made up of several taxes. When the application is filed only for the establishment of the working place, the taxes are: • Ascertaining certificate: 30 lei • Registration of secondary business place: 30 lei • Registration of the standard-form (regarding the fulfillment of the conditions to perform activities): 30 lei • Liquidation fund (50% of points 1-3): 6 lei • Bulletin fund (10% of points 1-3): 1.5 lei • Judicial stamp duty: 39 lei • Commission for the judge's mention: 60 lei • Transmission of documents to be published in the Official Gazette: 20 lei • Official Gazette commission (depends on the number of documents, for this example we have counted 5): 50 lei • Publication in the Official Gazette (depends on the number of rows in the document; only the resolution deciding the establishment of the working place is published): 80-150 lei •TOTAL: 350-420 lei.</p>	5 days	RON 350 - RON 420

GETTING CREDIT

Two types of frameworks can facilitate access to credit and improve its allocation: credit information systems and borrowers and lenders in collateral and bankruptcy laws. Credit information systems enable lenders' rights to view a potential borrower's financial history (positive or negative)—valuable information to consider when assessing risk. And they permit borrowers to establish a good credit history that will allow easier access to credit. Sound collateral laws enable businesses to use their assets, especially movable property, as security to generate capital—while strong creditors' rights have been associated with higher ratios of private sector credit to GDP.

What do the indicators cover?

Doing Business assesses the sharing of credit information and the legal rights of borrowers and lenders with respect to secured transactions through 2 sets of indicators. The depth of credit information index measures rules and practices affecting the coverage, scope and accessibility of credit information available through a credit registry or a credit bureau. The strength of legal rights index measures whether certain features that facilitate lending exist within the applicable collateral and bankruptcy laws. *Doing Business* uses two case scenarios, Case A and Case B, to determine the scope of the secured transactions system, involving a secured borrower and a secured lender and examining legal restrictions on the use of movable collateral (for more details on each case, see the Data Notes section of the *Doing Business 2015* report). These scenarios assume that the borrower:

- Is a private limited liability company.
- Has its headquarters and only base of operations in the largest business city. For the 11 economies with a population of more than 100 million, data for a second city have been added.

WHAT THE GETTING CREDIT INDICATORS MEASURE

Strength of legal rights index (0–12)³

Rights of borrowers and lenders through collateral laws

Protection of secured creditors' rights through bankruptcy laws

Depth of credit information index (0–8)⁴

Scope and accessibility of credit information distributed by credit bureaus and credit registries

Credit bureau coverage (% of adults)

Number of individuals and firms listed in largest credit bureau as percentage of adult population

Credit registry coverage (% of adults)

Number of individuals and firms listed in credit registry as percentage of adult population

- Has up to 50 employees.
- Is 100% domestically owned, as is the lender.

The ranking of economies on the ease of getting credit is determined by sorting their distance to frontier scores for getting credit. These scores are the distance to frontier score for the strength of legal rights index and the depth of credit information index.

³ For the legal rights index, 2 new points are added in *Doing Business 2015* for new data collected to assess the overall legal framework for secured transactions and the functioning of the collateral registry.

⁴ For the credit information index, 2 new points are added in *Doing Business 2015* for new data collected on accessing borrowers' credit information online and availability of credit scores.

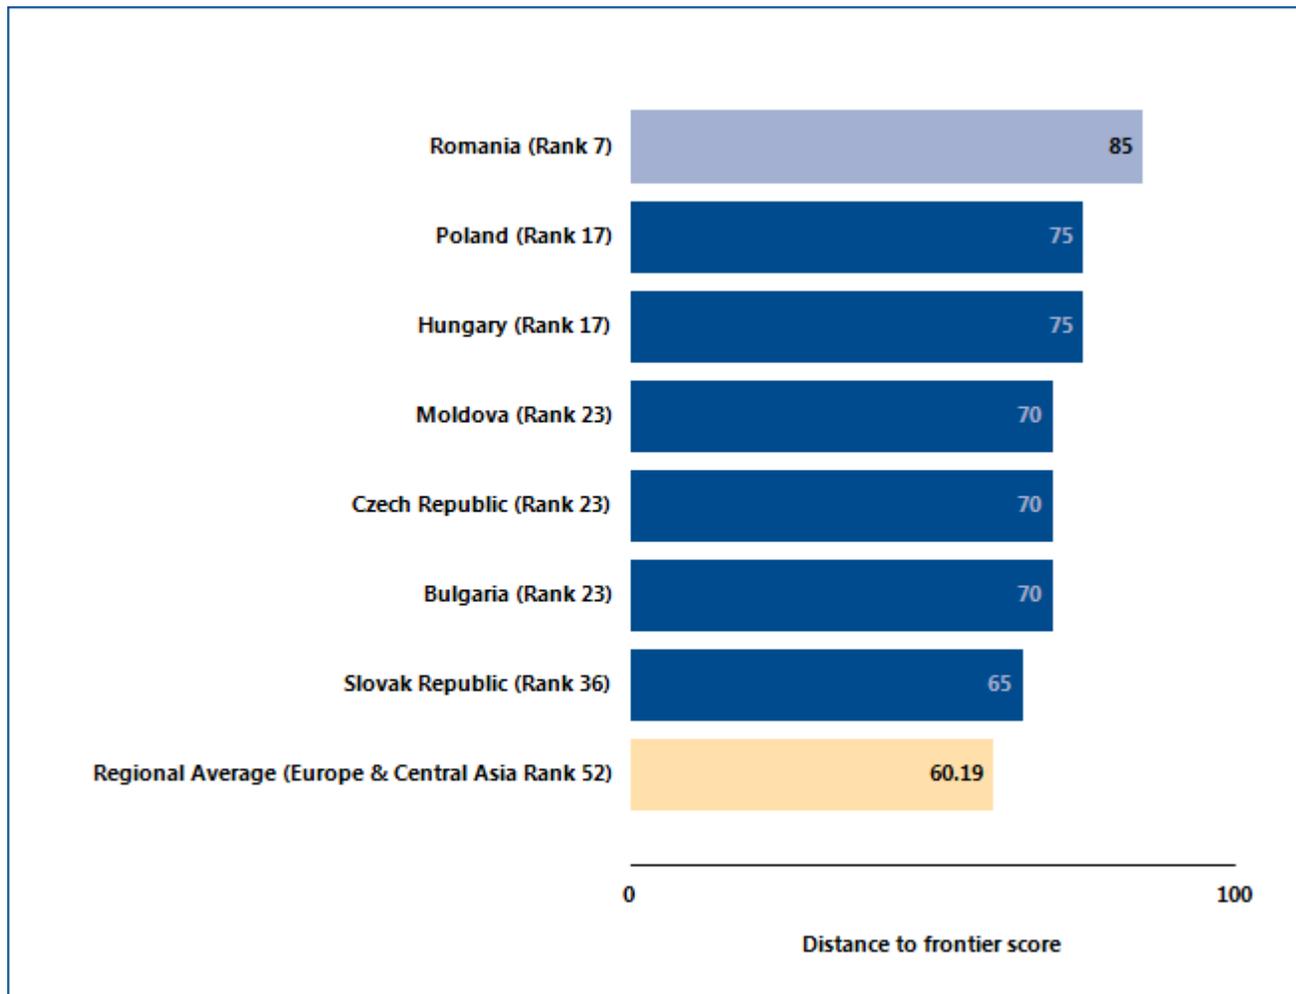

GETTING CREDIT

Where does the economy stand today?

How well do the credit information system and collateral and bankruptcy laws in Romania facilitate access to credit? The economy has a score of 7 on the depth of credit information index and a score of 10 on the strength of legal rights index (see the summary of scoring at the end of this chapter for details). Higher scores indicate more credit information and stronger legal rights for borrowers and lenders.

Globally, Romania stands at 7 in the ranking of 189 economies on the ease of getting credit (figure 6.1). The rankings for comparator economies and the regional average ranking provide other useful information for assessing how well regulations and institutions in Romania support lending and borrowing.

Figure 6.1 How Romania and comparator economies rank on the ease of getting credit

Source: Doing Business database.

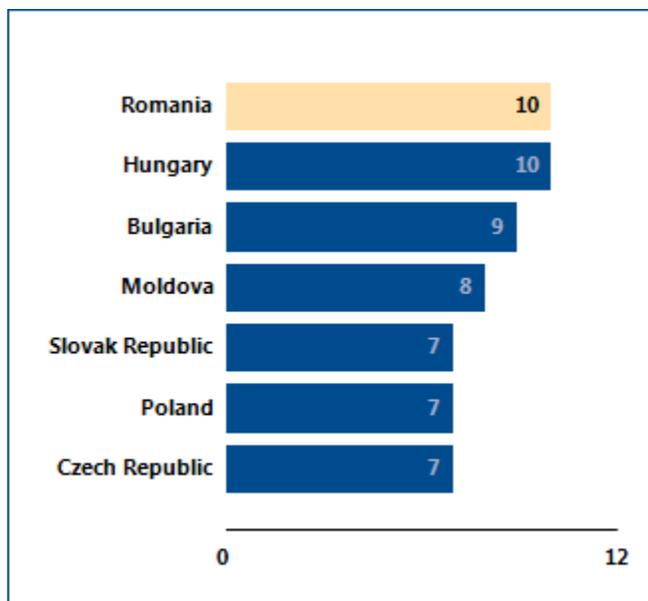

GETTING CREDIT

One way to put an economy’s score on the getting credit indicators into context is to see where the economy stands in the distribution of scores across economies. Figure 6.2 highlights the score on the strength of legal

rights index for Romania and shows the scores for comparator economies as well as the regional average score. Figure 6.3 shows the same for the depth of credit information index.

Figure 6.2 How strong are legal rights for borrowers and lenders?

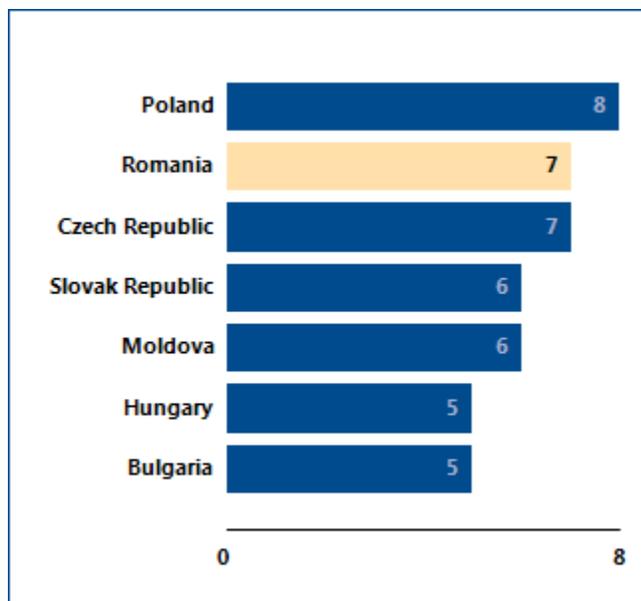

Economy scores on strength of legal rights index

Note: Higher scores indicate that collateral and bankruptcy laws are better designed to facilitate access to credit.
Source: Doing Business database.

Figure 6.3 How much credit information is shared—and how widely?

Economy scores on depth of credit information index

Note: Higher scores indicate the availability of more credit information, from either a credit registry or a credit bureau, to facilitate lending decisions. If the credit bureau or registry is not operational or covers less than 5% of the adult population, the total score on the depth of credit information index is 0.
Source: Doing Business database.

GETTING CREDIT

When economies strengthen the legal rights of lenders and borrowers under collateral and bankruptcy laws, and increase the scope, coverage and accessibility of credit

information, they can increase entrepreneurs' access to credit. What credit reforms has *Doing Business* recorded in Romania (table 6.1)?

Table 6.1 How has Romania made getting credit easier—or not?
By *Doing Business* report year from DB2010 to DB2015

DB year	Reform
DB2013	Romania strengthened its legal framework for secured transactions by allowing the automatic extension of security interests to the products, proceeds and replacement of collateral.

Note: For information on reforms in earlier years (back to DB2005), see the *Doing Business* reports for these years, available at <http://www.doingbusiness.org>.

Source: *Doing Business* database.

GETTING CREDIT

What are the details?

The getting credit indicators reported here for Romania are based on detailed information collected in that economy. The data on credit information sharing are collected through a survey of a credit registry and/or credit bureau (if one exists). To construct the depth of credit information index, a score of 1 is assigned for each of 8 features of the credit registry or credit bureau (see summary of scoring below).

The data on the legal rights of borrowers and lenders are gathered through a survey of financial lawyers and verified through analysis of laws and regulations as well as public sources of information on collateral and bankruptcy laws. For the strength of legal rights index, a score of 1 is assigned for each of 10 aspects related to legal rights in collateral law and 2 aspects in bankruptcy law.

Strength of legal rights index (0–12)	Index score: 10
Does an integrated or unified legal framework for secured transactions that extends to the creation, publicity and enforcement of functional equivalents to security interests in movable assets exist in the economy?	Yes
Does the law allow businesses to grant a non possessory security right in a single category of movable assets, without requiring a specific description of collateral?	Yes
Does the law allow businesses to grant a non possessory security right in substantially all of its assets, without requiring a specific description of collateral?	Yes
May a security right extend to future or after-acquired assets, and may it extend automatically to the products, proceeds or replacements of the original assets?	Yes
Is a general description of debts and obligations permitted in collateral agreements; can all types of debts and obligations be secured between parties; and can the collateral agreement include a maximum amount for which the assets are encumbered?	Yes
Is a collateral registry in operation for both incorporated and non-incorporated entities, that is unified geographically and by asset type, with an electronic database indexed by debtor's name?	Yes
Does a notice-based collateral registry exist in which all functional equivalents can be registered?	Yes
Does a modern collateral registry exist in which registrations, amendments, cancellations and searches can be performed online by any interested third party?	No
Are secured creditors paid first (i.e. before tax claims and employee claims) when a debtor defaults outside an insolvency procedure?	Yes
Are secured creditors paid first (i.e. before tax claims and employee claims) when a business is liquidated?	Yes
Are secured creditors subject to an automatic stay on enforcement when a debtor enters a court-supervised reorganization procedure? Does the law protect secured creditors' rights by providing clear grounds for relief from the stay and/or sets a time limit for it?	Yes

Strength of legal rights index (0–12)	Index score: 10
Does the law allow parties to agree on out of court enforcement at the time a security interest is created? Does the law allow the secured creditor to sell the collateral through public auction and private tender, as well as, for the secured creditor to keep the asset in satisfaction of the debt?	No

Depth of credit information index (0–8)	Credit bureau	Credit registry	Index score: 7
Are data on both firms and individuals distributed?	No	Yes	1
Are both positive and negative credit data distributed?	Yes	Yes	1
Are data from retailers or utility companies - in addition to data from banks and financial institutions - distributed?	No	No	0
Are at least 2 years of historical data distributed? (Credit bureaus and registries that distribute more than 10 years of negative data or erase data on defaults as soon as they are repaid obtain a score of 0 for this component.)	Yes	Yes	1
Are data on loan amounts below 1% of income per capita distributed?	Yes	No	1
By law, do borrowers have the right to access their data in the credit bureau or credit registry?	Yes	Yes	1
Can banks and financial institutions access borrowers' credit information online (for example, through an online platform, a system-to-system connection or both)?	Yes	Yes	1
Are bureau or registry credit scores offered as a value-added service to help banks and financial institutions assess the creditworthiness of borrowers?	Yes	No	1

Note: Prior to *Doing Business 2015*, the depth of credit information index covered only the first 6 features listed above. An economy receives a score of 1 if there is a "yes" to either bureau or registry. If the credit bureau or registry is not operational or covers less than 5% of the adult population, the total score on the depth of credit information index is 0.

Coverage	Credit bureau (% of adults)	Credit registry (% of adults)
Number of firms	0	240,597
Number of individuals	6,500,000	1,475,974
Percent of total	46.6	12.3

PROTECTING MINORITY INVESTORS

Protecting minority investors matters for the ability of companies to raise the capital they need to grow, innovate, diversify and compete. Effective regulations define related-party transactions precisely, promote clear and efficient disclosure requirements, require shareholder participation in major decisions of the company and set detailed standards of accountability for company insiders.

What do the indicators cover?

Doing Business measures the protection of minority investors from conflicts of interest through one set of indicators and shareholders' rights in corporate governance through another. The ranking of economies on the strength of minority investor protections is determined by sorting their distance to frontier scores for protecting minority investors. These scores are the simple average of the distance to frontier scores for the extent of conflict of interest regulation index and the extent of shareholder governance index. To make the data comparable across economies, a case study uses several assumptions about the business and the transaction.

The business (Buyer):

- Is a publicly traded corporation listed on the economy's most important stock exchange (or at least a large private company with multiple shareholders).
- Has a board of directors and a chief executive officer (CEO) who may legally act on behalf of Buyer where permitted, even if this is not specifically required by law.

The transaction involves the following details:

- Mr. James, a director and the majority shareholder of the company, proposes that the company purchase used trucks from another company he owns.
- The price is higher than the going price for used trucks, but the transaction goes forward.
- All required approvals are obtained, and all required disclosures made, though the transaction is prejudicial to Buyer.
- Shareholders sue the interested parties and the members of the board of directors.

WHAT THE PROTECTING MINORITY INVESTORS INDICATORS MEASURE

Extent of disclosure index (0–10)

Review and approval requirements for related-party transactions ; Disclosure requirements for related-party transactions

Extent of director liability index (0–10)

Ability of minority shareholders to sue and hold interested directors liable for prejudicial related-party transactions; Available legal remedies (damages, disgorgement of profits, fines, imprisonment, rescission of the transaction)

Ease of shareholder suits index (0–10)

Access to internal corporate documents; Evidence obtainable during trial and allocation of legal expenses

Extent of conflict of interest regulation index (0–10)

Sum of the extent of disclosure, extent of director liability and ease of shareholder indices, divided by 3

Extent of shareholder rights index (0-10.5)

Shareholders' rights and role in major corporate decisions

Strength of governance structure index (0-10.5)

Governance safeguards protecting shareholders from undue board control and entrenchment

Extent of corporate transparency index (0-9)

Corporate transparency on ownership stakes, compensation, audits and financial prospects

Extent of shareholder governance index (0–10)

Sum of the extent of shareholders rights, strength of governance structure and extent of corporate transparency indices, divided by 3

Strength of investor protection index (0–10)

Simple average of the extent of conflict of interest regulation and extent of shareholder governance indices

PROTECTING MINORITY INVESTORS

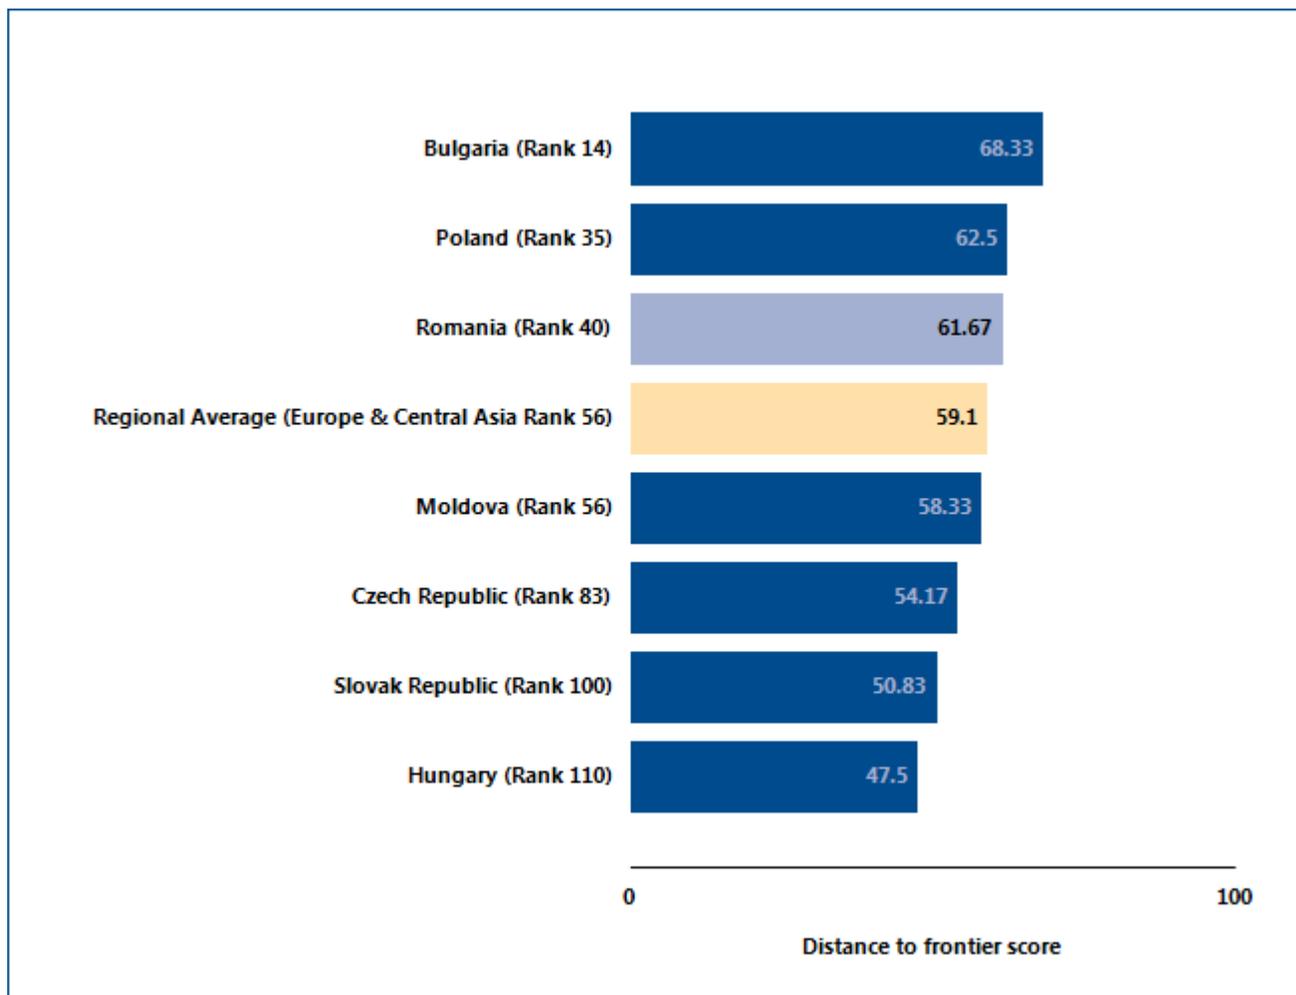

Where does the economy stand today?

How strong are minority investor protections against self-dealing in Romania? The economy has a score of 61.67 on the strength of minority investor protection index, with a higher score indicating stronger protections.

Globally, Romania stands at 40 in the ranking of 189 economies on the strength of minority investor

protection index (figure 7.1). While the indicator does not measure all aspects related to the protection of minority investors, a higher ranking does indicate that an economy's regulations offer stronger minority investor protections against self-dealing in the areas measured.

Figure 7.1 How Romania and comparator economies perform on the strength of minority investor protection index

Source: Doing Business database.

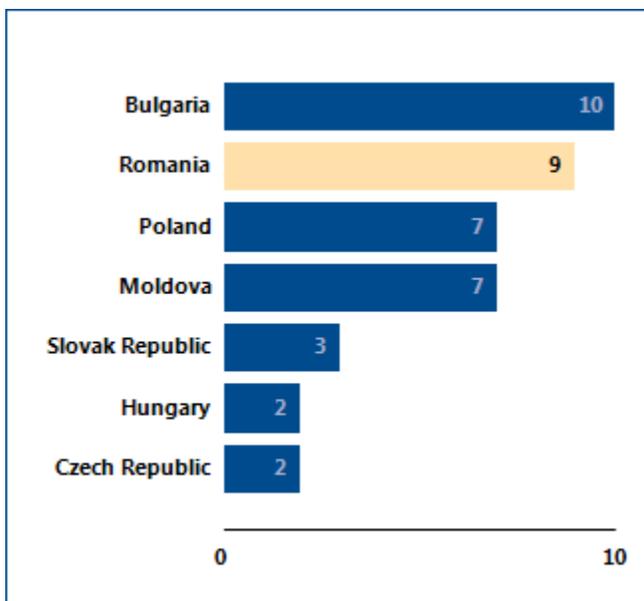

PROTECTING MINORITY INVESTORS

One way to put an economy's scores on the protecting minority investors indicators into context is to see where the economy stands in the distribution of scores across comparator economies. Figures 7.2 through 7.7 highlight the scores on the various minority investor protection

indices for Romania in 2014. A summary of scoring for the protecting minority investors indicators at the end of this chapter provides details on how the indices were calculated.

Figure 7.2 How extensive are disclosure requirements?

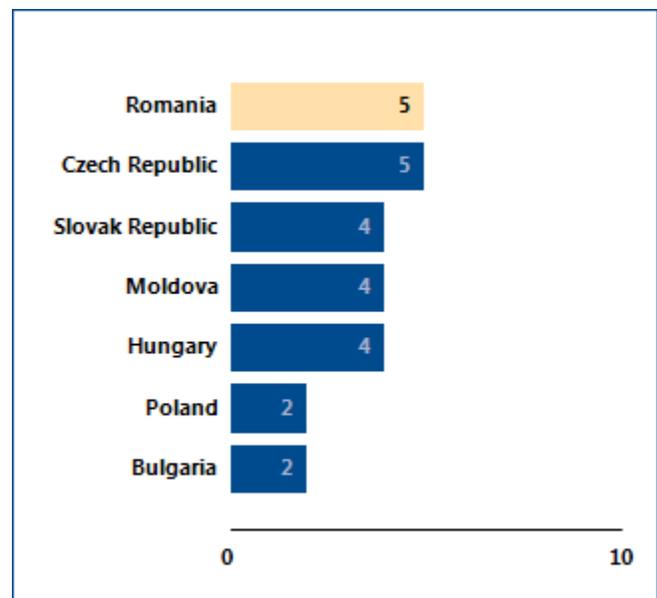

Extent of disclosure index (0-10)

Note: Higher scores indicate greater disclosure.

PROTECTING MINORITY INVESTORS

What are the details?

The protecting minority investors indicators reported here for Romania are based on detailed information collected through a survey of corporate and securities lawyers about securities regulations, company laws and court rules of evidence and procedure. To construct the six indicators on minority investor protection, scores are assigned to each based on a range of conditions relating

to disclosure, director liability, shareholder suits, shareholder rights, governance structure and corporate transparency in a standard case study (for more details, see the Data Notes section of the *Doing Business 2015* report). The summary below shows the details underlying the scores for Romania.

Table 7.2 Summary of scoring for the protecting minority investors indicators in Romania

	Answer	Score
Extent of disclosure index (0-10)		9.0
Which corporate body can provide legally sufficient approval for the Buyer-Seller transaction? (0-3)	Shareholders excluding interested parties	3
Is disclosure by the interested director to the board of directors required? (0-2)	Full disclosure of all material facts	2
Is disclosure of the transaction in published periodic filings (annual reports) required? (0-2)	Disclosure on the transaction and on the conflict of interest	2
Is immediate disclosure of the transaction to the public and/or shareholders required? (0-2)	Disclosure on the transaction and on the conflict of interest	2
Must an external body review the terms of the transaction before it takes place? (0-1)	No	0
Extent of director liability index (0-10)		5.0
Can shareholders sue directly or derivatively for the damage caused by the Buyer-Seller transaction to the company? (0-1)	Yes	1
Can shareholders hold the interested director liable for the damage caused by the transaction to the company? (0-2)	Liable if negligent	1
Can shareholders hold members of the approving body liable for the damage caused by the transaction to the company? (0-2)	Liable if negligent	1
Must the interested director pay damages for the harm caused to the company upon a successful claim by a shareholder plaintiff? (0-1)	Yes	1
Must the interested director repay profits made from the transaction upon a successful claim by a shareholder plaintiff? (0-1)	No	0
Can both fines and imprisonment be applied against the interested director? (0-1)	Yes	1
Can a court void the transaction upon a successful claim by a shareholder plaintiff? (0-2)	Only in case of fraud or bad faith	0
Ease of shareholder suits index (0-10)		5.0
Before filing suit, can shareholders owning 10% of the company's share capital inspect the transaction documents? (0-1)	Yes	1
Can the plaintiff obtain any documents from the defendant	Any relevant document	3

and witnesses during trial? (0-3)		
Can the plaintiff request categories of documents from the defendant without identifying specific ones? (0-1)	No	0
Can the plaintiff directly question the defendant and witnesses during trial? (0-2)	No	0
Is the level of proof required for civil suits lower than that of criminal cases? (0-1)	No	0
Can shareholder plaintiffs recover their legal expenses from the company? (0-2)	Yes if successful	1
Strength of minority investor protection index (0-10)		6.2
Extent of conflict of interest regulation index (0-10)		6.3
Extent of shareholder rights index (0-10.5)		10.5
Can shareholders amend company bylaws or statutes with a simple majority?	Yes	1.5
Can shareholders owning 10% of the company's share capital call for an extraordinary meeting of shareholders?	Yes	1.5
Can shareholders remove members of the board of directors before the end of their term.	Yes	1.5
Must a company obtain its shareholders' approval every time it issues new shares?	Yes	1.5
Are shareholders automatically granted subscription rights on new shares?	Yes	1.5
Must shareholders approve the election and dismissal of the external auditor?	Yes	1.5
Can shareholders freely trade shares prior to a major corporate action or meeting of shareholders?	Yes	1.5
Strength of governance structure index (0-10.5)		2.5
Is the CEO barred from also serving as chair of the board of directors?	Yes	1.5
Must the board of directors include independent board members?	No	0
Must a company have a separate audit committee?	No	0
Must changes to the voting rights of a series or class of shares be approved only by the holders of the affected shares?	Yes	1.5
Must a potential acquirer make a tender offer to all shareholders upon acquiring 50% of a company?	Yes for listed companies	1
Is cross-shareholding between 2 independent companies limited to 10% of outstanding shares?	No	0
Is a subsidiary barred from acquiring shares issued by its parent company?	Yes	1.5
Extent of corporate transparency index (0-9)		5.0
Must ownership stakes representing 10% be disclosed?	Yes	1.5
Must information about board members' other directorships as well as basic information on their primary employment be disclosed?	No	0
Must the compensation of individual managers be disclosed?	No	0
Must financial statements contain explanatory notes on significant accounting policies, trends, risks, uncertainties and other factors influencing the reporting?	Yes for listed companies	1
Must annual financial statements be audited by an external	Yes	1.5

auditor?		
Must audit reports be disclosed to the public?	Yes for listed companies	1
Extent of shareholder governance index (0-10)		6.0

Source: *Doing Business* database.

PAYING TAXES

Taxes are essential. The level of tax rates needs to be carefully chosen—and needless complexity in tax rules avoided. Firms in economies that rank better on the ease of paying taxes in the *Doing Business* study tend to perceive both tax rates and tax administration as less of an obstacle to business according to the World Bank Enterprise Survey research.

What do the indicators cover?

Using a case scenario, *Doing Business* measures the taxes and mandatory contributions that a medium-size company must pay in a given year as well as the administrative burden of paying taxes and contributions. This case scenario uses a set of financial statements and assumptions about transactions made over the year. Information is also compiled on the frequency of filing and payments as well as time taken to comply with tax laws. The ranking of economies on the ease of paying taxes is determined by sorting their distance to frontier scores on the ease of paying taxes. These scores are the simple average of the distance to frontier scores for each of the component indicators, with a threshold and a nonlinear transformation applied to one of the component indicators, the total tax rate⁵. The financial statement variables have been updated to be proportional to 2012 income per capita; previously they were proportional to 2005 income per capita. To make the data comparable across economies, several assumptions are used.

- TaxpayerCo is a medium-size business that started operations on January 1, 2012.
- The business starts from the same financial position in each economy. All the taxes and mandatory contributions are recorded at all levels of government.

⁵ The nonlinear distance to frontier for the total tax rate is equal to the distance to frontier for the total tax rate if the total tax rate is greater than the threshold and is equal to the distance to frontier for the total tax rate multiplied by the ratio of the total tax rate to the threshold if the total tax rate is less than the threshold. The threshold is defined as the total tax rate of the 15th percentile of the distribution for all economies included in the analysis. It is calculated and adjusted on a yearly basis. The second year of operation is recorded for an “optimal tax rate” that minimizes distortions or maximizes efficiency in the tax system of an economy overall. Instead, it is mainly empirical in nature, set at the lower end of the distribution of tax rates. A range of standard deductions and exemptions are also recorded.

• Taxes and mandatory contributions are recorded at all levels of government. Taxes and mandatory contributions include corporate income tax, turnover tax and all labor taxes and contributions paid by the company.

• A range of standard deductions and exemptions are also recorded.

Indicators toward economies that do not need to levy significant taxes on companies like the *Doing Business* standardized case study company because they raise public revenue in other ways—for example, through taxes on foreign companies, through taxes on sectors other than manufacturing or from natural resources (all of which are outside the scope of the methodology). This year’s threshold is 26.1%.

WHAT THE PAYING TAXES INDICATORS MEASURE

Tax payments for a manufacturing company in 2013 (number per year adjusted for electronic and joint filing and payment)

Total number of taxes and contributions paid, including consumption taxes (value added tax, sales tax or goods and service tax)

Method and frequency of filing and payment

Time required to comply with 3 major taxes (hours per year)

Collecting information and computing the tax payable

Completing tax return forms, filing with proper agencies

Arranging payment or withholding

Preparing separate tax accounting books, if required

Total tax rate (% of profit before all taxes)

Profit or corporate income tax

Social contributions and labor taxes paid by the employer

Property and property transfer taxes

Dividend, capital gains and financial transactions taxes

Waste collection, vehicle, road and other taxes

- Taxes and mandatory contributions include corporate income tax, turnover tax and all labor taxes and contributions paid by the company.

- A range of standard deductions and exemptions are also recorded.

PAYING TAXES

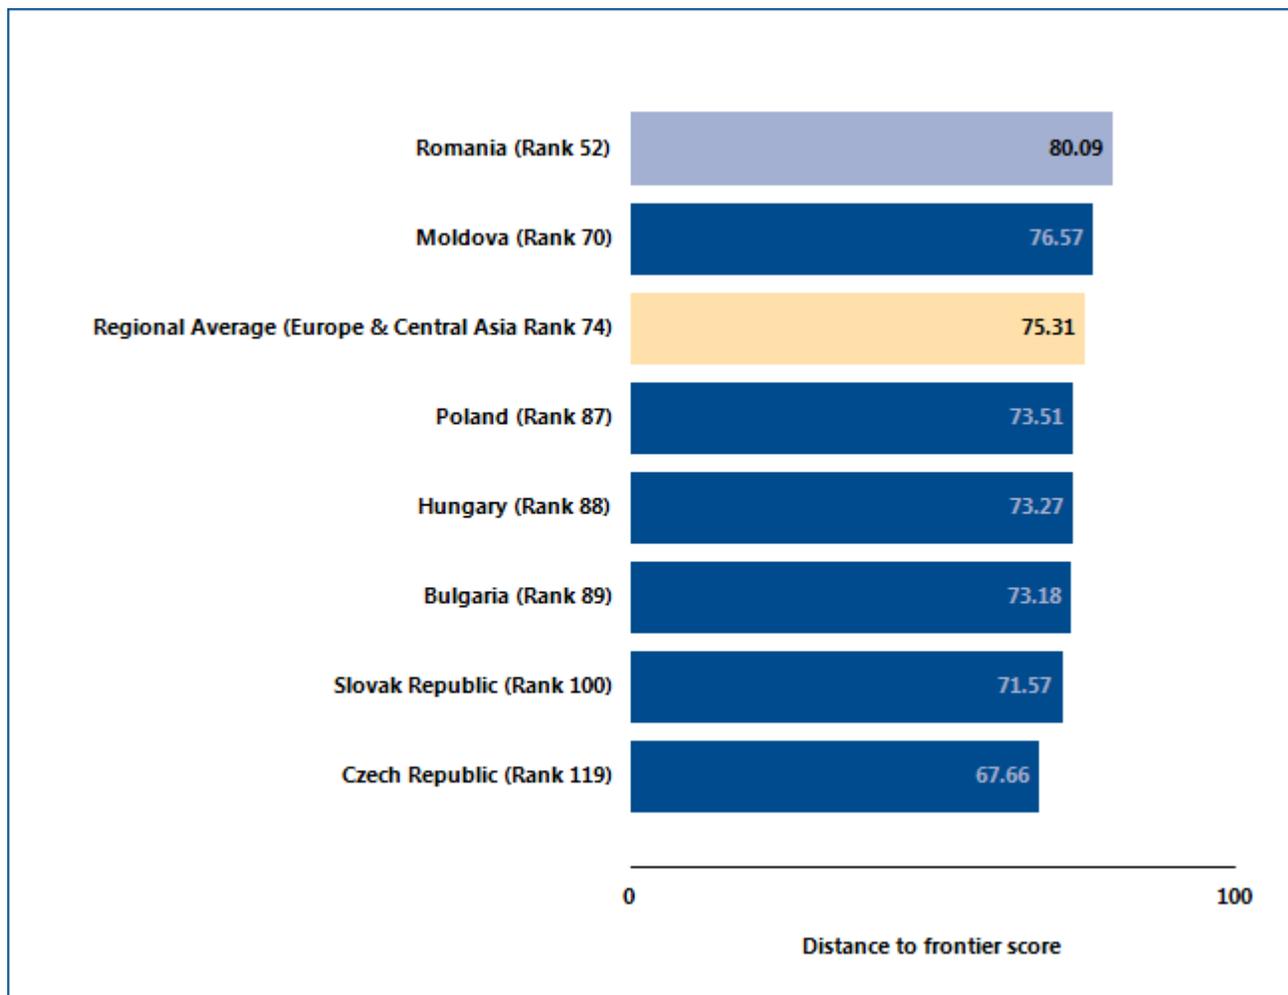

Where does the economy stand today?

What is the administrative burden of complying with taxes in Romania—and how much do firms pay in taxes? On average, firms make 14.0 tax payments a year, spend 159.0 hours a year filing, preparing and paying taxes and pay total taxes amounting to 43.2% of profit (see the summary at the end of this chapter for details). Most indicator sets refer to a case scenario in the largest business city of an economy, except for 11 economies for which the data are a population-weighted average of the

2 largest business cities. See the chapter on distance to frontier and ease of doing business ranking at the end of this profile for more details.

Globally, Romania stands at 52 in the ranking of 189 economies on the ease of paying taxes (figure 8.1). The rankings for comparator economies and the regional average ranking provide other useful information for assessing the tax compliance burden for businesses in Romania.

Figure 8.1 How Romania and comparator economies rank on the ease of paying taxes

Source: Doing Business database.

PAYING TAXES

Economies around the world have made paying taxes faster and easier for businesses—such as by consolidating filings, reducing the frequency of payments or offering electronic filing and payment. Many have lowered tax rates. Changes have brought

concrete results. Some economies simplifying tax payment and reducing rates have seen tax revenue rise. What tax reforms has *Doing Business* recorded in Romania (table 8.1)?

Table 8.1 How has Romania made paying taxes easier—or not?
By *Doing Business* report year from DB2010 to DB2015

DB year	Reform
DB2010	Romania made paying taxes more costly for companies by increasing labor taxes.
DB2011	Romania introduced tax changes, including a new minimum tax on profit, that made paying taxes more costly for companies.
DB2012	Romania made paying taxes easier for companies by introducing an electronic payment system and a unified return for social security contributions. It also abolished the annual minimum tax.
DB2014	Romania made paying taxes easier and less costly for companies by reducing the payment frequency for the firm tax from quarterly to twice a year and by reducing the vehicle tax rate.
DB2015	Romania made paying taxes easier for companies, with the majority now using the electronic system for filing and paying taxes.

Note: For information on reforms in earlier years (back to DB2006), see the *Doing Business* reports for these years, available at <http://www.doingbusiness.org>.

Source: *Doing Business* database.

PAYING TAXES

What are the details?

The indicators reported here for Romania are based on the taxes and contributions that would be paid by a standardized case study company used by *Doing Business* in collecting the data (see the section in this chapter on what the indicators cover). Tax practitioners are asked to review a set of financial statements as well as a standardized list of assumptions and transactions that the company completed during its 2nd year of operation. Respondents are asked how much taxes and mandatory contributions the business must pay and how these taxes are filed and paid.

LOCATION OF STANDARDIZED COMPANY

City: Bucharest

The taxes and contributions paid are listed in the summary below, along with the associated number of payments, time and tax rate.

Table 8.2 Summary of tax rates and administration

Tax or mandatory contribution	Payments (number)	Notes on payments	Time (hours)	Statutory tax rate	Tax base	Total tax rate (% of profit)	Notes on total tax rate
Social security contributions	1	online filing	80	20.8%	gross salaries	23.5	
Corporate income tax	1	online filing	25	16%	taxable profit	10.7	
Health insurance contributions	0	paid jointly	0	5.2%	gross salaries	5.9	
Building tax	2		0	1%	building value	1	
Medical leave	0	paid jointly	0	0.85%	gross salaries	1	
Unemployment contribution	0	paid jointly	0	0.5%	gross salaries	0.6	
Accident risk fund	0	paid jointly	0	0.15-0.85%	gross salaries	0.3	
Guarantee fund	0	paid jointly	0	0.25%	gross salaries	0.3	
Vehicle tax	2		0	varies	fixed fee depending on type of vehicle	0	

Tax or mandatory contribution	Payments (number)	Notes on payments	Time (hours)	Statutory tax rate	Tax base	Total tax rate (% of profit)	Notes on total tax rate
Land tax	2		0	various rates	land area	0	
Firm tax	2		0	A fixed amount per square meter of lighting panel	The surface of the lighting panel	0	
Urbanism tax	1		0		surface	0	
Environmental taxes	1		0	RON 2 per kilo of packaging	weight of packaging	0	small amount
Fuel tax	1		0		included in fuel price	0	small amount
Stamp duty on contracts	0	as needed	0	various rates	type of contract	0	small amount
Value added tax (VAT)	1	online filing	54	24%	value added	0	not included
Employee paid - Social security contributions	0	paid jointly	0	16.5%	gross salaries	0	withheld
Totals	14.0		159.0			43.2

TRADING ACROSS BORDERS

In today's globalized world, making trade between economies easier is increasingly important for business. Excessive document requirements, burdensome customs procedures, inefficient port operations and inadequate infrastructure all lead to extra costs and delays for exporters and importers, stifling trade potential. Research shows that exporters in developing countries gain more from a 10% drop in their trading costs than from a similar reduction in the tariffs applied to their products in global markets.

What do the indicators cover?

Doing Business measures the time and cost (excluding tariffs and the time and cost for sea transport) associated with exporting and importing a standard shipment of goods by sea transport, and the number of documents necessary to complete the transaction. The indicators cover predefined stages such as documentation requirements and procedures at customs and other regulatory agencies as well as at the port. They also cover trade logistics, including the time and cost of inland transport to the largest business city. The ranking of economies on the ease of trading across borders is determined by sorting their distance to frontier scores for trading across borders. These scores are the simple average of the distance to frontier scores for each of the component indicators. To make the data comparable across economies, *Doing Business* uses several assumptions about the business and the traded goods.

The business:

- Is located in the economy's largest business city. For the 11 economies with a population of more than 100 million, data for a second city have been added.
- Is a private, limited liability company, domestically owned and does not operate with special export or import privileges.
- Conducts export and import activities, but does not have any special accreditation such as an authorized economic operator status.

WHAT THE TRADING ACROSS BORDERS INDICATORS MEASURE

Documents required to export and import (number)

- Bank documents
- Customs clearance documents
- Port and terminal handling documents
- Transport documents

Time required to export and import (days)

- Obtaining, filling out and submitting all the documents
- Inland transport and handling
- Customs clearance and inspections
- Port and terminal handling
- Does not include sea transport time

Cost required to export and import (US\$ per container)

- All documentation
- Inland transport and handling
- Customs clearance and inspections
- Port and terminal handling
- Official costs only, no bribes

The traded product:

- Is not hazardous nor includes military items.
- Does not require refrigeration or any other special environment.
- Do not require any special phytosanitary or environmental safety standards other than accepted international standards.
- Is one of the economy's leading export or import products.
- Is transported in a dry-cargo, 20-foot full container load.

TRADING ACROSS BORDERS

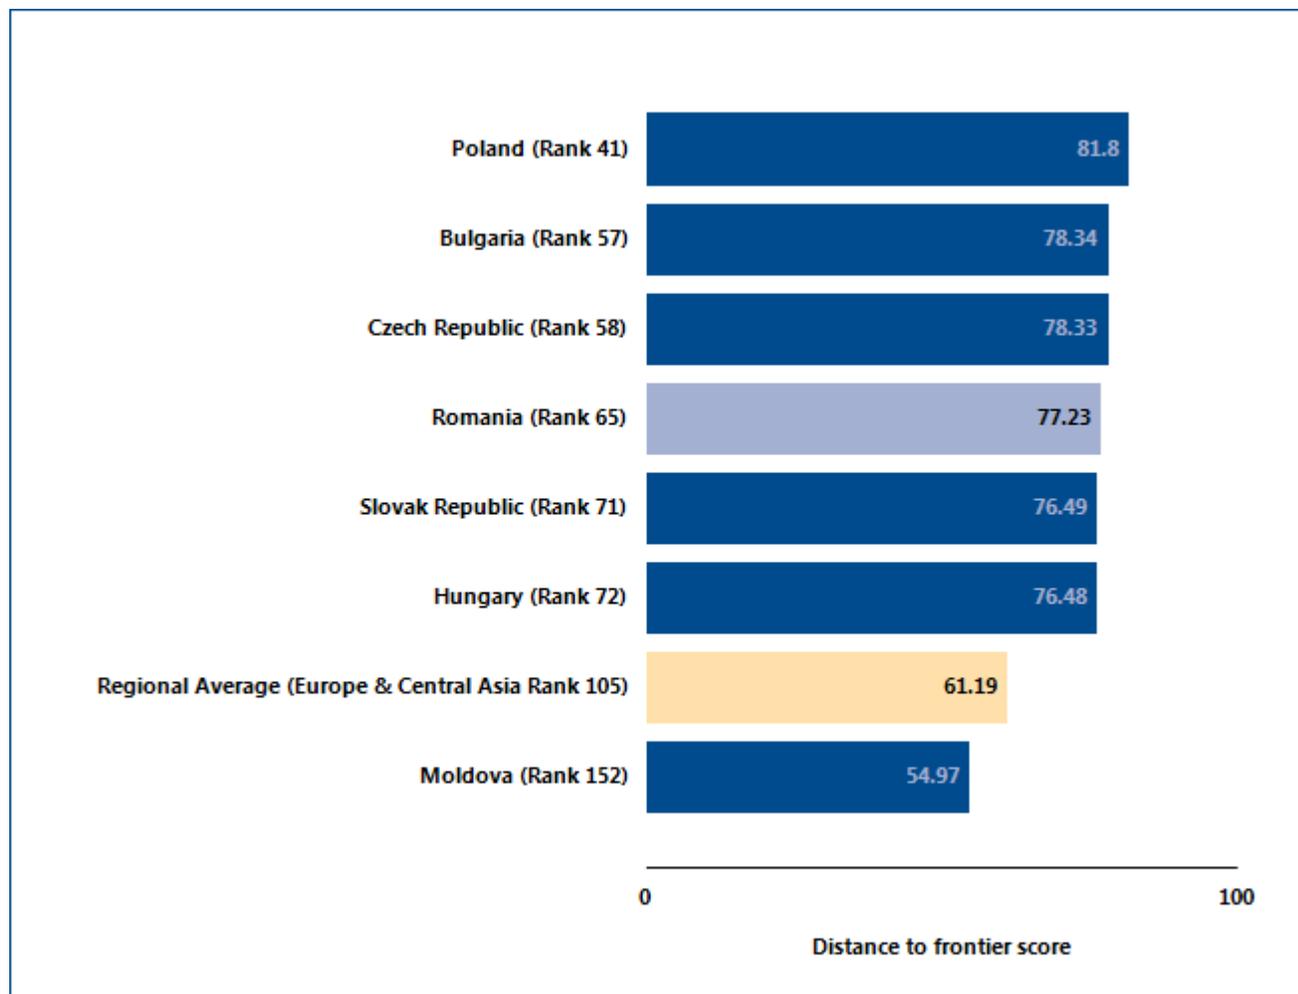

Where does the economy stand today?

What does it take to export or import in Romania? According to data collected by *Doing Business*, exporting a standard container of goods requires 5 documents, takes 13.0 days and costs \$1485.0. Importing the same container of goods requires 6 documents, takes 13.0 days and costs \$1495.0 (see the summary of four predefined stages and documents at the end of this chapter for details). Most indicator sets refer to a case scenario in the largest business city of an economy, except for 11 economies for which the data are a

population-weighted average of the 2 largest business cities. See the chapter on distance to frontier and ease of doing business ranking at the end of this profile for more details.

Globally, Romania stands at 65 in the ranking of 189 economies on the ease of trading across borders (figure 9.1). The rankings for comparator economies and the regional average ranking provide other useful information for assessing how easy it is for a business in Romania to export and import goods.

Figure 9.1 How Romania and comparator economies rank on the ease of trading across borders

Source: *Doing Business* database.

TRADING ACROSS BORDERS

What are the details?

The indicators reported here for Romania are based on a set of specific predefined stages for trading a standard shipment of goods by ocean transport (see the section in this chapter on what the indicators cover). Information on the required documents and the time and cost to complete export and import is collected from local freight forwarders, shipping lines, customs brokers, port officials and banks.

LOCATION OF STANDARDIZED COMPANY

Port Name: Costanta

City: Bucharest

The predefined stages, and the associated time and cost, for exporting and importing a standard shipment of goods are listed in the summary below, along with the required documents.

Table 9.2 Summary of predefined stages and documents for trading across borders in Romania

Stages to export	Time (days)	Cost (US\$)
Customs clearance and inspections	1	75
Documents preparation	7	410
Inland transportation and handling	2	700
Ports and terminal handling	3	300
Totals	13	1,485

Stages to import	Time (days)	Cost (US\$)
Customs clearance and inspections	1	75
Documents preparation	8	420
Inland transportation and handling	2	700
Ports and terminal handling	2	300
Totals	13	1,495

ENFORCING CONTRACTS

Effective commercial dispute resolution has many benefits. Courts are essential for entrepreneurs because they interpret the rules of the market and protect economic rights. Efficient and transparent courts encourage new business relationships because businesses know they can rely on the courts if a new customer fails to pay. Speedy trials are essential for small enterprises, which may lack the resources to stay in business while awaiting the outcome of a long court dispute.

What do the indicators cover?

Doing Business measures the efficiency of the judicial system in resolving a commercial dispute before local courts. Following the step-by-step evolution of a standardized case study, it collects data relating to the time, cost and procedural complexity of resolving a commercial lawsuit. The ranking on the ease of enforcing contracts is the simple average of the percentile rankings on its component indicators: procedures, time and cost.

The dispute in the case study involves the breach of a sales contract between 2 domestic businesses. The case study assumes that the court hears an expert on the quality of the goods in dispute. This distinguishes the case from simple debt enforcement. To make the data comparable across economies, *Doing Business* uses several assumptions about the case:

- The seller and buyer are located in the economy's largest business city. For the 11 economies with a population of more than 100 million, data for a second city have been added.
- The buyer orders custom-made goods, then fails to pay.
- The seller sues the buyer before a competent court.
- The value of the claim is 200% of the income per capita or the equivalent in local currency of USD 5,000, whichever is greater.

WHAT THE ENFORCING CONTRACTS

INDICATORS MEASURE

Procedures to enforce a contract through the courts (number)

- Steps to file and serve the case
- Steps for trial and judgment
- Steps to enforce the judgment

Time required to complete procedures (calendar days)

- Time to file and serve the case
- Time for trial and obtaining judgment
- Time to enforce the judgment

Cost required to complete procedures (% of claim)

- Average attorney fees
- Court costs
- Enforcement costs

- The seller requests a pretrial attachment to secure the claim.
- The dispute on the quality of the goods requires an expert opinion.
- The judge decides in favor of the seller; there is no appeal.
- The seller enforces the judgment through a public sale of the buyer's movable assets.

ENFORCING CONTRACTS

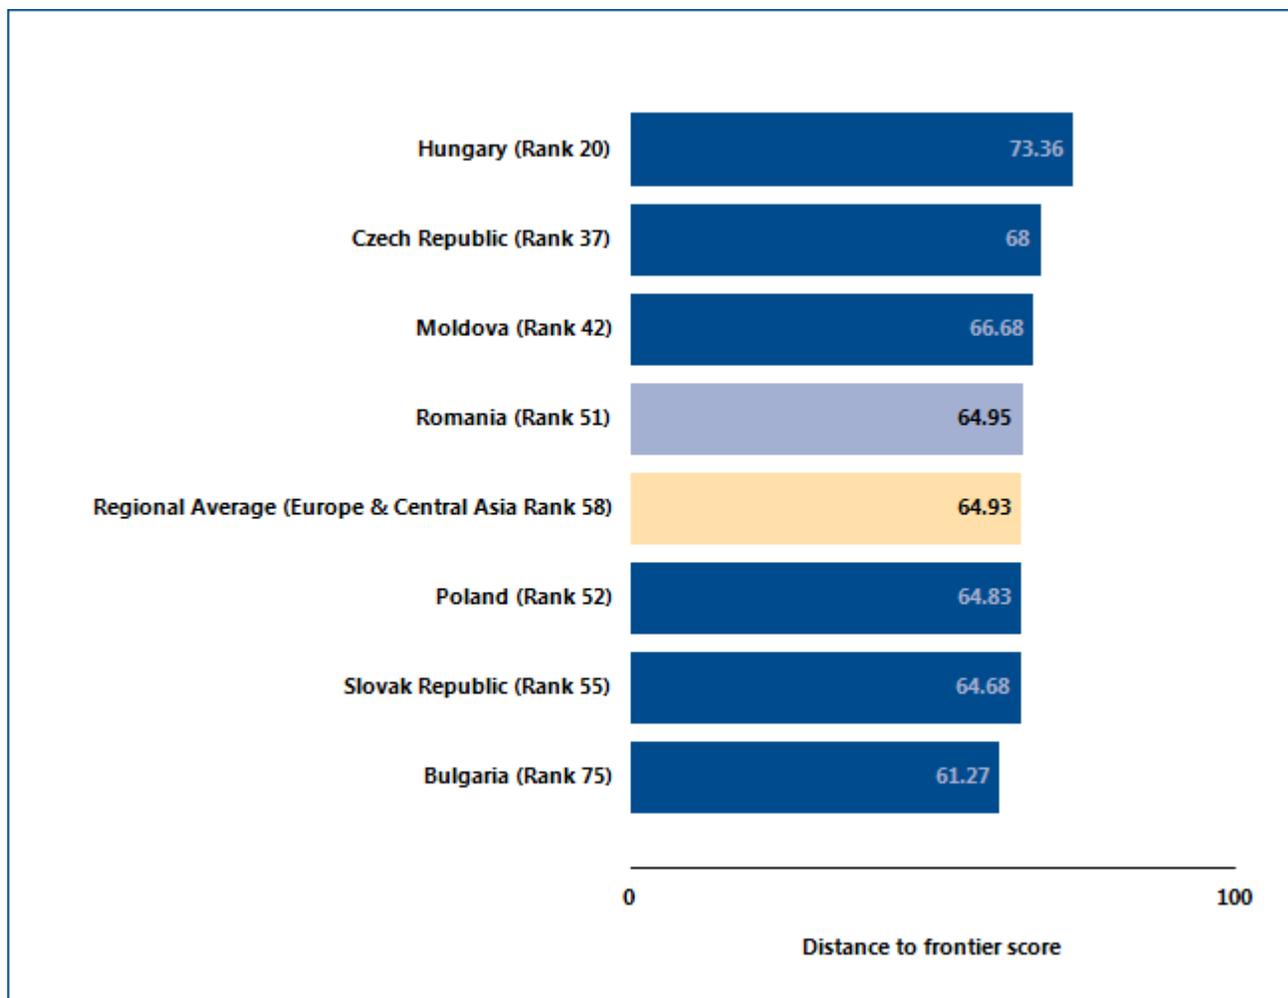

Where does the economy stand today?

How efficient is the process of resolving a commercial dispute through the courts in Romania? According to data collected by *Doing Business*, contract enforcement takes 512.0 days, costs 28.9% of the value of the claim and requires 34.0 procedures (see the summary at the end of this chapter for details). Most indicator sets refer to a case scenario in the largest business city of an economy, except for 11 economies for which the data are a population-weighted average of the 2 largest

business cities. See the chapter on distance to frontier and ease of doing business ranking at the end of this profile for more details.

Globally, Romania stands at 51 in the ranking of 189 economies on the ease of enforcing contracts (figure 10.1). The rankings for comparator economies and the regional average ranking provide other useful benchmarks for assessing the efficiency of contract enforcement in Romania.

Figure 10.1 How Romania and comparator economies rank on the ease of enforcing contracts

Source: *Doing Business* database.

ENFORCING CONTRACTS

Economies in all regions have improved contract enforcement in recent years. A judiciary can be improved in different ways. Higher-income economies tend to look for ways to enhance efficiency by introducing new technology. Lower-income economies often work on

reducing backlogs by introducing periodic reviews to clear inactive cases from the docket and by making procedures faster. What reforms making it easier (or more difficult) to enforce contracts has *Doing Business* recorded in Romania (table 10.1)?

Table 10.1 How has Romania made enforcing contracts easier—or not?

By *Doing Business* report year from DB2010 to DB2015

DB year	Reform
DB2014	Romania made enforcing contracts easier by adopting a new civil procedure code that streamlines and speeds up all court proceedings.

Note: For information on reforms in earlier years (back to DB2005), see the *Doing Business* reports for these years, available at <http://www.doingbusiness.org>.

Source: *Doing Business* database.

ENFORCING CONTRACTS

What are the details?

The indicators reported here for Romania are based on a set of specific procedural steps required to resolve a standardized commercial dispute through the courts (see the section in this chapter on what the indicators cover). These procedures, and the time and cost of completing them, are identified through study of the codes of civil procedure and other court regulations, as well as through questionnaires completed by local litigation lawyers (and, in a quarter of the economies covered by *Doing Business*, by judges as well).

COURT NAME

Claim value:	RON 54,402
Court name:	Bucharest Court of First Instance
City:	Bucharest

Table 10.2 Summary of time, cost and procedures for enforcing a contract in Romania

Indicator	Romania	Europe & Central Asia average
Time (days)	512	448
Filing and service	52	
Trial and judgment	365	
Enforcement of judgment	95	
Cost (% of claim)	28.9	25.2
Attorney cost (% of claim)	7.7	
Court cost (% of claim)	11.2	
Enforcement Cost (% of claim)	10.0	
Procedures (number)	34	37
Number of procedures (without bonus points)	35	
Specialized commercial courts	-1	
Total number of procedures (including bonus points)	34	

No.	Procedures
	Filing and service:
1	Plaintiff requests payment: Plaintiff or his lawyer asks Defendant orally or in writing to comply with the contract.
2	Mandatory conciliation or mediation: Plaintiff and Defendant attempt to settle the dispute prior to initiating the lawsuit. Conciliation or mediation is unsuccessful. Attempts at settlement are recorded and the judge is informed of same.
3	Plaintiff hires a lawyer: Plaintiff hires a lawyer.
*	Plaintiff files a summons and complaint: Plaintiff files a summons and complaint with the court (orally or in writing).
*	Plaintiff pays court fees: Plaintiff pays court fees (e.g. court duties, stamp duties, or any other type of court fees). Answer 'yes' even if Plaintiff recovers these costs.
4	Registration of court case: Registration of court case by the court administration (this can include assigning a reference number to the case).
*	Assignment of court case to a judge: Assignment of court case to a judge (through a random procedure, automated system, ruling of an administrative judge, court officer, etc).
5	Judicial scrutiny of summons and complaint: Judge examines Plaintiff's summons and complaint for formal requirements as a matter of law or standard practice.
6	Delivery of summons and complaint to person authorized to perform service of process on Defendant: The judge or a court officer delivers the summons to a summoning office, officer, or authorized person (including Plaintiff), for service of process on Defendant.
*	Mailing of summons and complaint: Court or process server, including (private) bailiff, mails summons and complaint to Defendant.
7	Attempt at physical delivery: An attempt to physically deliver summons and complaint to Defendant is made.
*	Application for pre-judgment attachment: Plaintiff submits an application in writing for the attachment of Defendant's property prior to judgment.
*	Decision on pre-judgment attachment: Judge decides whether to grant Plaintiff's request for pre-judgment attachment of Defendant's property and notifies Plaintiff and Defendant of the decision.
8	Pre-judgment attachment order: Defendant's property is attached prior to judgment. Attachment order either involves physical attachment, or is achieved by freezing, registering, marking, or otherwise separating and restricting Defendant's movement of specific moveable assets.
9	Report on pre-judgment attachment: Court enforcement officer or private bailiff issues and delivers a report on the attachment of Defendant's property to the judge.
	Trial and judgment:

No.	Procedures
*	Defendant files preliminary objections.: Defendant presents preliminary objections to the court. (Preliminary exemptions differ from answers on the merits. Examples of preliminary motions are motions to dismiss on the basis of the statute of limitations or jurisdictional objections, etc.) Checke
*	Plaintiff's answer to preliminary motions: Plaintiff responds to preliminary motions raised by Defendant. Checked as 'yes' if preliminary motions are commonly raised (step 30) and if Plaintiff responds to them immediately.
10	Judge's resolution on preliminary objections: Judge decides on preliminary objections separately from the merits of the case. Checked as 'yes' if preliminary objections are commonly made (step 30) and if judge resolves the question before rendering his decision.
11	Defendant files an answer to Plaintiff's claim: Defendant files a written pleading which includes his answer or defense on the merits of the case (see assumption 4).
12	Deadline for Plaintiff to reply to Defendant's defense or answer: Judge sets a deadline for Plaintiff's submission of a reply to the Defendant's defense or answer.
*	Court appointment of independent expert: Judge appoints, either at the parties' request or at his own initiative, an independent expert to decide whether the quality of the goods Plaintiff delivered to Defendant is adequate. (see assumption 5-b).
*	Delivery of expert report by court-appointed expert: The independent expert, appointed by the court, delivers his or her expert report to the court (see assumption 5-b).
*	Setting of date(s) for oral hearing or trial: Judge sets the date(s) for the oral hearing or trial.
*	List of (expert) witnesses: The parties file a list of (expert) witnesses with the court (see assumption 5-a).
13	Summoning of (expert) witnesses: The court summons (expert) witnesses to appear in court for the oral hearing or trial (see assumption 5-a).
14	Adjournments: Court proceedings are delayed because one or both parties request and obtain an adjournment to prepare for the oral hearing or trial as a matter of common practice.
15	Oral hearing (prevalent in civil law): The parties argue the merits of the case at an oral hearing before the judge. Witnesses and a court-appointed independent expert may be heard and questioned at the oral hearing.
16	Closing of the evidence period: The court makes the formal decision to close the evidence period.
17	Order for submission of final arguments: The judge sets a deadline for the submission of final factual and legal arguments.
*	Final arguments: The parties present their final factual and legal arguments to the court either by oral presentation or by a written submission.
18	Judgment date: The judge sets a date for delivery of the judgment.
19	Notification of judgment in court: The parties are notified of the judgment at a court hearing.
20	Writing of judgment: The judge produces a written copy of the judgment.
21	Court notification of availability of the written judgment: The court notifies the parties that the written judgment is available at the courthouse.

No.	Procedures
22	Plaintiff receives a copy of the judgment: Plaintiff receives a copy of the written judgment which is 100% in favor of Plaintiff (see assumption 6).
23	Defendant is formally notified of the judgment: Plaintiff or court formally notifies the Defendant of the judgment. The appeal period starts to run from the day the Defendant is formally notified of the judgment.
24	Appeal period: By law Defendant has the opportunity to appeal the judgment during a specified period. Defendant decides not to appeal. Seller decides to start enforcing the judgment when the appeal period ends (see assumption 8).
25	Order for reimbursement by Defendant of Plaintiff's court fees: The judgment orders Defendant to reimburse Plaintiff for the court fees Plaintiff has advanced, because Defendant has lost the case.
	Enforcement of judgment:
*	Plaintiff hires a lawyer: Plaintiff hires a lawyer to enforce the judgment or continues to be represented by a lawyer during the enforcement of judgment phase.
26	Plaintiff retains an enforcement agent to enforce the judgment.: Plaintiff retains the services of a court enforcement officer such as a court bailiff or sheriff, or a private bailiff.
27	Plaintiff advances enforcement fees: Plaintiff pays the fees related to the enforcement of the judgment.
28	Request to Defendant to comply voluntarily with judgment: Plaintiff, a court enforcement officer or a private bailiff requests Defendant to voluntarily comply with the judgment.
29	Plaintiff identifies Defendant's assets for attachment: Plaintiff identifies Defendant's assets for attachment.
30	Attachment: Defendant's movable goods are attached (physically or by registering, marking or separating assets).
31	Report on execution of attachment: A court enforcement officer or private bailiff delivers a report on the attachment of Defendant's movable goods to the judge.
32	Enforcement disputes before court: The enforcement of the judgment is delayed because Defendant opposes aspects of the enforcement process before the judge.
33	Sale through public auction: The Defendant's movable property is sold at public auction.
34	Distribution of proceeds: The proceeds of the public auction are distributed to Plaintiff (and, where applicable, to other creditors, according to the rules of priority).
35	Reimbursement of Plaintiff's enforcement fees: Defendant reimburses Plaintiff's enforcement fees which Plaintiff had advanced previously.

* Not counted in the total number of procedures.

RESOLVING INSOLVENCY

A robust bankruptcy system functions as a filter, ensuring the survival of economically efficient companies and reallocating the resources of inefficient ones. Fast and cheap insolvency proceedings result in the speedy return of businesses to normal operation and increase returns to creditors. By improving the expectations of creditors and debtors about the outcome of insolvency proceedings, well-functioning insolvency systems can facilitate access to finance, save more viable businesses and thereby improve growth and sustainability in the economy overall.

What do the indicators cover?

Doing Business studies the time, cost and outcome of insolvency proceedings involving domestic legal entities. These variables are used to calculate the recovery rate, which is recorded as cents on the dollar recouped by secured creditors through reorganization, liquidation or debt enforcement (foreclosure) proceedings. To determine the present value of the amount recovered by creditors, *Doing Business* uses the lending rates from the International Monetary Fund, supplemented with data from central banks and the Economist Intelligence Unit.

In addition, *Doing Business* evaluates the adequacy and integrity of the existing legal framework applicable to liquidation and reorganization proceedings through the strength of insolvency framework index. The index tests whether economies adopted internationally accepted good practices in four areas: commencement of proceedings, management of debtor's assets, reorganization proceedings and creditor participation.

The ranking of the Resolving Insolvency indicator is based on the recovery rate and the total score of the strength of insolvency framework index. The Resolving Insolvency indicator does not measure insolvency proceedings of individuals and financial institutions. The data are derived from survey responses by local insolvency practitioners and verified through a study of laws and regulations as well as public information on bankruptcy systems.

WHAT THE RESOLVING INSOLVENCY INDICATORS MEASURE

Time required to recover debt (years)

Measured in calendar years

Appeals and requests for extension are included

Cost required to recover debt (% of debtor's estate)

Measured as percentage of estate value

Court fees

Fees of insolvency administrators

Lawyers' fees

Assessors' and auctioneers' fees

Other related fees

Outcome

Whether business continues operating as a going concern or business assets are sold piecemeal

Recovery rate for creditors

Measures the cents on the dollar recovered by secured creditors

Outcome for the business (survival or not) determines the maximum value that can be recovered

Official costs of the insolvency proceedings are deducted

Depreciation of furniture is taken into account

Present value of debt recovered

Strength of insolvency framework index (0-16)

Sum of the scores of four component indices:

Commencement of proceedings index (0-3)

Management of debtor's assets index (0-6)

Reorganization proceedings index (0-3)

Creditor participation index (0-4)

RESOLVING INSOLVENCY

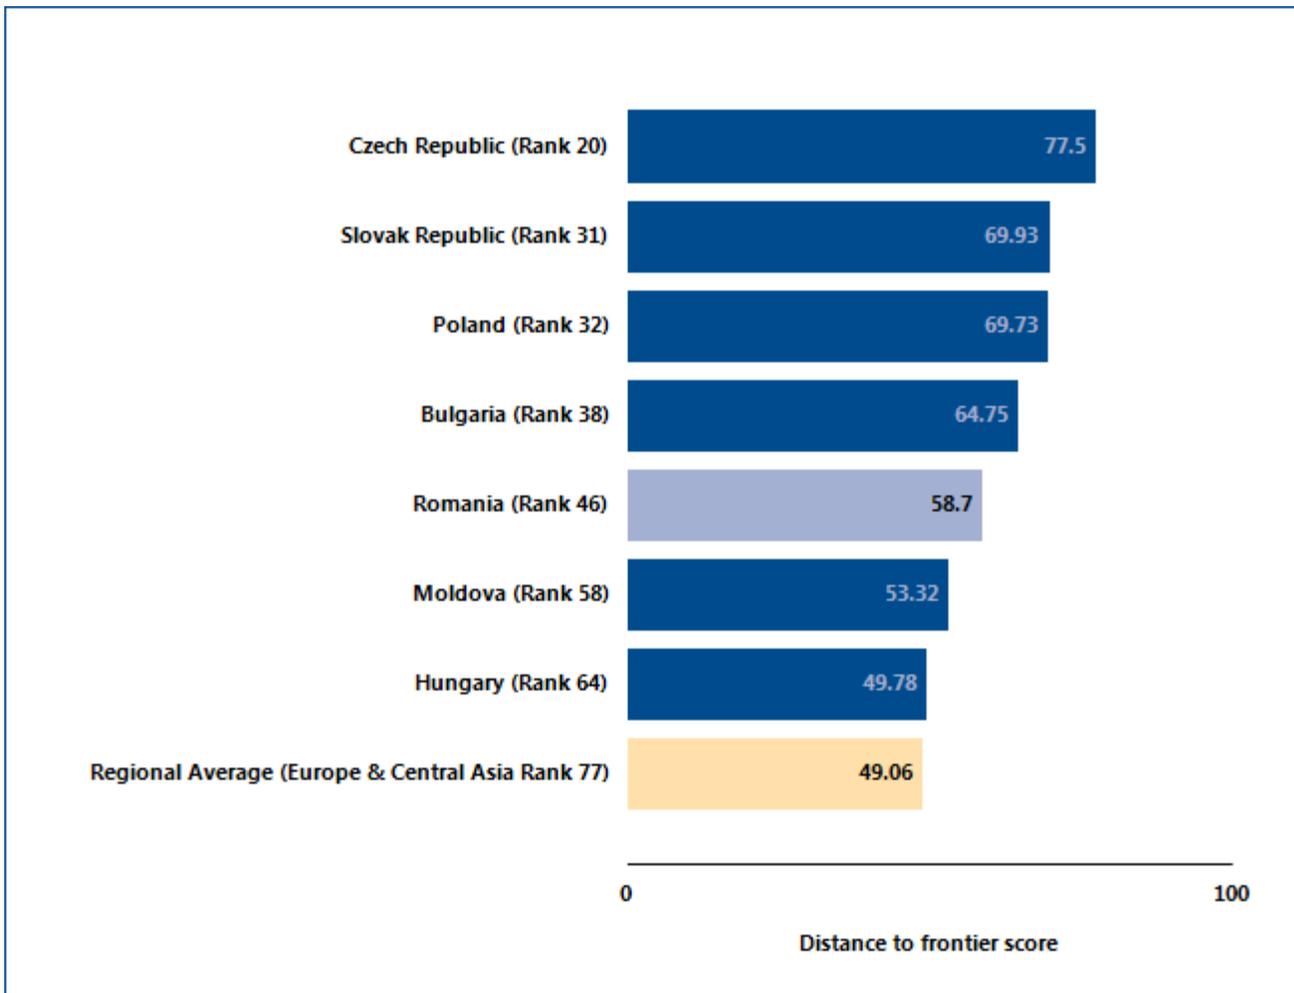

Where does the economy stand today?

Combination of quality regulations and efficient practice characterize the top-performing economies. How efficient are insolvency proceedings in Romania? According to data collected by *Doing Business*, resolving insolvency takes 3.3 years on average and costs 10.5% of the debtor's estate, with the most likely outcome being that the company will be sold as piecemeal sale. The average recovery rate is 30.7 cents on the dollar. Most indicator sets refer to a case scenario in the largest business city of an economy, except for 11 economies for which the data are a population-weighted average of the 2 largest business cities. See the chapter on distance to frontier and ease of doing business ranking at the end of this profile for more details.

According to data collected by *Doing Business*, Romania scores 3.0 out of 3 points on the commencement of proceedings index, 6.0 out of 6 points on the management of debtor's assets index, 2.5 out of 3 points on the reorganization proceedings index, and 2.0 out of 4 points on the creditor participation index. Romania's total score on the strength of insolvency framework index is 13.5 out of 16.

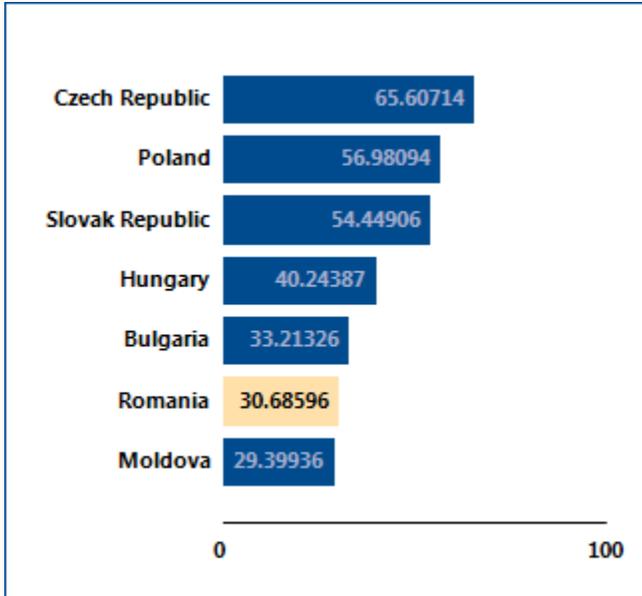

Globally, Romania stands at 46 in the ranking of 189 economies on the ease of resolving insolvency (figure 11.1). The rankings for comparator economies and the regional average ranking provide other useful benchmarks for assessing the efficiency of insolvency proceedings in Romania.

RESOLVING INSOLVENCY

A well-balanced bankruptcy system distinguishes companies that are financially distressed but economically viable from inefficient companies that should be liquidated. But in some insolvency systems even viable businesses are liquidated. This is starting to

change. Many recent reforms of bankruptcy laws have been aimed at helping more of the viable businesses survive. What insolvency reforms has *Doing Business* recorded in Romania (table 11.1)?

Table 11.1 How has Romania made resolving insolvency easier—or not?

By *Doing Business* report year from DB2010 to DB2015

DB year	Reform
DB2010	Romania made resolving insolvency more difficult by requiring that a percentage of recovered amounts be transferred to a fund for reimbursing the expenses of insolvency administrators in cases where the debtor has no assets.
DB2011	Substantial amendments to Romania's bankruptcy laws—introducing, among other things, a procedure for out-of-court workouts—made dealing with insolvency easier.
DB2012	Romania amended its insolvency law to shorten the duration of insolvency proceedings.

Note: For information on reforms in earlier years (back to DB2005), see the *Doing Business* reports for these years, available at <http://www.doingbusiness.org>.

LABOR MARKET REGULATION

Doing Business measures flexibility in the regulation of employment, specifically as it affects the hiring and redundancy of workers and the rigidity of working hours. This year, for the first time, the indicators measuring flexibility in labor market regulations focus on those affecting the food retail industry, using a standardized case study of a cashier in a supermarket. Also new is that *Doing Business* collects data on regulations applying to employees hired through temporary-work agencies as well as on those applying to permanent employees or employees hired on fixed-term contracts. The indicators also cover additional areas of labor market regulation, including social protection schemes and benefits as well as labor disputes.

Over the period from 2007 to 2011 improvements were made to align the methodology for the labor market regulation indicators (formerly the employing workers indicators) with the letter and spirit of the International Labour Organization (ILO) conventions. Only 6 of the 188 ILO conventions cover areas measured by *Doing Business*: employee termination, weekend work, holiday with pay, night work, protection against unemployment and medical care and sickness benefits. The *Doing Business* methodology is fully consistent with these 6 conventions. The ILO conventions covering areas related to the labor market regulation indicators do not include the ILO core labor standards—8 conventions covering the right to collective bargaining, the elimination of forced labor, the abolition of child labor and equitable treatment in employment practices.

Between 2009 and 2011 the World Bank Group worked with a consultative group—including labor lawyers, employer and employee representatives, and experts from the ILO, the Organisation for Economic Co-operation and Development (OECD), civil society and the private sector—to review the methodology for the labor market regulation indicators and explore future areas of research.

A full report with the conclusions of the consultative group is available at:
<http://www.doingbusiness.org/methodology/employing-workers>.

Doing Business 2015 presents the data for the labor market regulation indicators in an annex. The report does not present rankings of economies on these indicators nor include the topic in the aggregate distance to frontier score or ranking on the ease of doing business. Detailed data collected on labor market regulations are available on the *Doing Business* website (<http://www.doingbusiness.org>). The data on labor market regulations are based on a detailed survey of employment regulations that is completed by local lawyers and public officials. Employment laws and regulations as well as secondary sources are reviewed to ensure accuracy. To make the data comparable across economies, several assumptions about the worker and the business are used.

The worker:

- Is a cashier in a supermarket or a grocery store
- Is a full-time employee
- Is not a member of the labor union, unless membership is mandatory

The business:

- Is a limited liability company (or the equivalent in the economy) with 60 employees.
- Operates a supermarket or grocery store in the economy's largest business city. For 11 economies the data are also collected for the second largest business city.
- Is subject to collective bargaining agreements if such agreements cover more than 50% of the food retail sector and they apply even to firms that are not party to them.
- Abides by every law and regulation but does not grant workers more benefits than those mandated by law, regulation or (if applicable) collective bargaining agreements.

LABOR MARKET REGULATION

Employment laws are needed to protect workers from arbitrary or unfair treatment and to ensure efficient contracting between employers and workers. Many economies that changed their labor market regulation in

the past 5 years did so in ways that increased labor market flexibility. What changes did Romania adopt that affected the *Doing Business* indicators on labor market regulation (table 12.1)?

Table 12.1 What changes did Romania make in terms of labor market regulation?

DB year	Reform
DB2012	Romania increased the maximum duration of fixed-term contracts and also decreased the severance pay applicable in case of redundancy dismissal of employees.

Source: *Doing Business* database.

LABOR MARKET REGULATION

What are the details?

The data reported here for Romania are based on a detailed survey of labor market regulation that is completed by local lawyers and public officials.

Employment laws and regulations as well as secondary sources are reviewed to ensure accuracy.

Difficulty of hiring index

Difficulty of hiring covers 4 areas: (i) whether fixed-term contracts are prohibited for permanent tasks; (ii) the maximum cumulative duration of fixed-term contracts; (iii) the minimum wage for a cashier, age 19, with 1 year of work experience; and (iv) the ratio of the minimum

wage to the average value added per worker. The average value added per worker is the ratio of an economy's GNI per capita to the working-age population as a percentage of the total population.

Difficulty of hiring index	Data
Fixed-term contracts prohibited for permanent tasks?	Yes
Maximum length of a single fixed-term contract (months)	36
Maximum length of fixed-term contracts, including renewals (months)	60
Minimum wage applicable to the worker assumed in the case study (US\$/month)	251.28
Ratio of minimum wage to value added per worker	0.23

Source: *Doing Business* database.

LABOR MARKET REGULATION

Rigidity of hours index

Rigidity of hours covers 7 areas: (i) whether the workweek can extend to 50 hours or more (including overtime) for 2 months in a year to respond to a seasonal increase in workload; (ii) the maximum number of days allowed in the workweek; (iii) the premium for night work (as a percentage of hourly pay); (iv) the premium for work on a weekly rest day (as a percentage of hourly pay); (v) whether there are restrictions on night work; (vi) whether there are restrictions on weekly holiday work; and (vii) the average paid annual leave for workers with 1 year of tenure, 5 years of tenure and 10 years of tenure.

Rigidity of hours index	Data
50-hour workweek allowed for 2 months a year in case of a seasonal increase in workload?	Yes
Maximum working days per week	5.0
Premium for night work (% of hourly pay)	25%
Premium for work on weekly rest day (% of hourly pay)	100%
Major restrictions on night work?	No
Major restrictions on weekly holiday?	No
Paid annual leave for a worker with 1 year of tenure (in working days)	20.0
Paid annual leave for a worker with 5 years of tenure (in working days)	20.0
Paid annual leave for a worker with 10 years of tenure (in working days)	20.0
Paid annual leave (average for workers with 1, 5 and 10 years of tenure, in working days)	20.0

Source: *Doing Business* database.

LABOR MARKET REGULATION

Difficulty of redundancy index

Difficulty of redundancy index looks at 9 questions: (i) what the length is in months of the maximum probationary period; (ii) whether redundancy is disallowed as a basis for terminating workers; (iii) whether the employer needs to notify a third party (such as a government agency) to terminate 1 redundant worker; (iv) whether the employer needs to notify a third party to terminate a group of 9 redundant workers; (v)

whether the employer needs approval from a third party to terminate 1 redundant worker; (vi) whether the employer needs approval from a third party to terminate a group of 9 redundant workers; (vii) whether the law requires the employer to reassign or retrain a worker before making the worker redundant; (viii) whether priority rules apply for redundancies; and (ix) whether priority rules apply for reemployment.

Difficulty of redundancy index	Data
Maximum length of probationary period (months)	3.0
Dismissal due to redundancy allowed by law?	Yes
Third-party notification if 1 worker is dismissed?	No
Third-party approval if 1 worker is dismissed?	No
Third-party notification if 9 workers are dismissed?	No
Third-party approval if 9 workers are dismissed?	No
Retraining or reassignment obligation before redundancy?	Yes
Priority rules for redundancies?	Yes
Priority rules for reemployment?	Yes

Source: *Doing Business* database.

LABOR MARKET REGULATION

Redundancy cost

Redundancy cost measures the cost of advance notice requirements, severance payments and penalties due when terminating a redundant worker, expressed in weeks of salary. The average value of notice

requirements and severance payments applicable to a worker with 1 year of tenure, a worker with 5 years and a worker with 10 years is considered. One month is recorded as 4 and 1/3 weeks.

Redundancy cost indicator (in salary weeks)	Data
Notice period for redundancy dismissal for a worker with 1 year of tenure	4.0
Notice period for redundancy dismissal for a worker with 5 years of tenure	4.0
Notice period for redundancy dismissal for a worker with 10 years of tenure	4.0
Notice period for redundancy dismissal (average for workers with 1, 5 and 10 years of tenure)	4.0
Severance pay for redundancy dismissal for a worker with 1 year of tenure	0.0
Severance pay for redundancy dismissal for a worker with 5 years of tenure	0.0
Severance pay for redundancy dismissal for a worker with 10 years of tenure	0.0
Severance pay for redundancy dismissal (average for workers with 1, 5 and 10 years of tenure)	0.0

Source: *Doing Business* database.

Social protection schemes and benefits & Labor disputes

Doing Business collects data on the existence of unemployment protection schemes as well as data on whether employers are legally required to provide health insurance for employees with permanent contracts.

Doing Business also assesses the mechanisms available to resolve labor disputes. More specifically, it collects data on what courts would be competent to hear labor disputes and whether the competent court is specialized in resolving labor disputes.

Social protection schemes and benefits & Labor disputes indicator	Data
Availability of unemployment protection scheme?	Yes
Health insurance existing for permanent employees?	Yes
Availability of courts or court sections specializing in labor disputes?	Yes

Source: *Doing Business* database.

DISTANCE TO FRONTIER AND EASE OF DOING BUSINESS RANKING

This year's report presents results for 2 aggregate measures: the distance to frontier score and the ease of doing business ranking, which for the first time this year is based on the distance to frontier score. The ease of doing business ranking compares economies with one another; the distance to frontier score benchmarks economies with respect to regulatory best practice, showing the absolute distance to the best performance on each *Doing Business* indicator. When compared across years, the distance to frontier score shows how much the regulatory environment for local entrepreneurs in an economy has changed over time in absolute terms, while the ease of doing business ranking can show only how much the regulatory environment has changed relative to that in other economies.

Distance to Frontier

The distance to frontier score captures the gap between an economy's performance and a measure of best practice across the entire sample of 31 indicators for 10 *Doing Business* topics (the labor market regulation indicators are excluded). For starting a business, for example, Canada and New Zealand have the smallest number of procedures required (1), and New Zealand the shortest time to fulfill them (0.5 days). Slovenia has the lowest cost (0.0), and Australia, Colombia and 110 other economies have no paid-in minimum capital requirement (table 15.1 in the *Doing Business 2015* report).

Calculation of the distance to frontier score

Calculating the distance to frontier score for each economy involves 2 main steps. First, individual component indicators are normalized to a common unit where each of the 31 component indicators y (except for the total tax rate) is rescaled using the linear transformation $(\text{worst} - y)/(\text{worst} - \text{frontier})$. In this formulation the frontier represents the best performance on the indicator across all economies since 2005 or the third year after data for the indicator were collected for the first time. For legal indicators such as those on getting credit or protecting minority investors, the frontier is set at the highest possible value. For the total tax rate, consistent with the use of a threshold in calculating the rankings on this indicator, the frontier is

defined as the total tax rate at the 15th percentile of the overall distribution for all years included in the analysis. For the time to pay taxes the frontier is defined as the lowest time recorded among all economies that levy the 3 major taxes: profit tax, labor taxes and mandatory contributions, and value added tax (VAT) or sales tax. In addition, the cost to export and cost to import for each year are divided by the GDP deflator, to take the general price level into account when benchmarking these absolute-cost indicators across economies with different inflation trends. The base year for the deflator is 2013 for all economies.

In the same formulation, to mitigate the effects of extreme outliers in the distributions of the rescaled data for most component indicators (very few economies need 700 days to complete the procedures to start a business, but many need 9 days), the worst performance is calculated after the removal of outliers. The definition of outliers is based on the distribution for each component indicator. To simplify the process, 2 rules were defined: the 95th percentile is used for the indicators with the most dispersed distributions (including time, cost, minimum capital and number of payments to pay taxes), and the 99th percentile is used for number of procedures and number of documents to trade. No outlier was removed for component indicators bound by definition or construction, including legal index scores (such as the depth of credit information index, extent of conflict of interest regulation index and strength of insolvency framework index) and the recovery rate (figure 15.1 in the *Doing Business 2015* report).

Second, for each economy the scores obtained for individual indicators are aggregated through simple averaging into one distance to frontier score, first for each topic and then across all 10 topics: starting a business, dealing with construction permits, getting electricity, registering property, getting credit, protecting minority investors, paying taxes, trading across borders, enforcing contracts and resolving insolvency. More complex aggregation methods—such as principal components and unobserved components—yield a ranking nearly identical to the simple average used by *Doing Business*⁶. Thus *Doing Business* uses the simplest

⁶ See Djankov, Manraj and others (2005). Principal components and unobserved components methods yield a ranking nearly identical to

method: weighting all topics equally and, within each topic, giving equal weight to each of the topic components⁷.

An economy's distance to frontier score is indicated on a scale from 0 to 100, where 0 represents the worst performance and 100 the frontier. All distance to frontier calculations are based on a maximum of 5 decimals. However, indicator ranking calculations and the ease of doing business ranking calculations are based on 2 decimals. The difference between an economy's distance to frontier score in any previous year and its score in 2014 illustrates the extent to which the economy has closed the gap to the regulatory frontier over time. And in any given year the score measures how far an economy is from the best performance at that time.

Treatment of the total tax rate

This year, for the first time, the total tax rate component of the paying taxes indicator set enters the distance to frontier calculation in a different way than any other indicator. The distance to frontier score obtained for the total tax rate is transformed in a nonlinear fashion before it enters the distance to frontier score for paying taxes. As a result of the nonlinear transformation, an increase in the total tax rate has a smaller impact on the distance to frontier score for the total tax rate—and therefore on the distance to frontier score for paying taxes—for economies with a below-average total tax rate than it would have in the calculation done in previous years (line B is smaller than line A in figure 15.2 of the *Doing Business 2015* report). And for economies with an extreme total tax rate (a rate that is very high relative to the average), an increase has a greater impact on both these distance to frontier scores than before (line D is bigger than line C in figure 15.2 of the *Doing Business 2015* report).

The nonlinear transformation is not based on any economic theory of an "optimal tax rate" that minimizes distortions or maximizes efficiency in an economy's

that from the simple average method because both these methods assign roughly equal weights to the topics, since the pairwise correlations among indicators do not differ much. An alternative to the simple average method is to give different weights to the topics, depending on which are considered of more or less importance in the context of a specific economy.

⁷ For getting credit, indicators are weighted proportionally, according to their contribution to the total score, with a weight of 60% assigned to the strength of legal rights index and 40% to the depth of credit information index. Indicators for all other topics are assigned equal weights

overall tax system. Instead, it is mainly empirical in nature. The nonlinear transformation along with the threshold reduces the bias in the indicator toward economies that do not need to levy significant taxes on companies like the *Doing Business* standardized case study company because they raise public revenue in other ways—for example, through taxes on foreign companies, through taxes on sectors other than manufacturing or from natural resources (all of which are outside the scope of the methodology). In addition, it acknowledges the need of economies to collect taxes from firms.

Calculation of scores for economies with 2 cities covered

For each of the 11 economies for which a second city was added in this year's report, the distance to frontier score is calculated as the population-weighted average of the distance to frontier scores for the 2 cities covered (table 12.1). This is done for the aggregate score, the scores for each topic and the scores for all the component indicators for each topic.

Table 12.1 Weights used in calculating the distance to frontier scores for economies with 2 cities covered

Economy	City	Weight (%)
Bangladesh	Dhaka	78
	Chittagong	22
Brazil	São Paulo	61
	Rio de Janeiro	39
China	Shanghai	55
	Beijing	45
India	Mumbai	47
	Delhi	53
Indonesia	Jakarta	78
	Surabaya	22
Japan	Tokyo	65
	Osaka	35
Mexico	Mexico City	83
	Monterrey	17
Nigeria	Lagos	77
	Kano	23
Pakistan	Karachi	65
	Lahore	35
Russian Federation	Moscow	70
	St. Petersburg	30
United States	New York	60
	Los Angeles	40

Economies that improved the most across 3 or more *Doing Business* topics in 2013/14

Doing Business 2015 uses a simple method to calculate which economies improved the ease of doing business the most. First, it selects the economies that in 2013/14 implemented regulatory reforms making it easier to do business in 3 or more of the 10 topics included in this year's aggregate distance to frontier score. Twenty-one economies meet this criterion: Azerbaijan; Benin; the Democratic Republic of Congo; Côte d'Ivoire; the Czech Republic; Greece; India; Ireland; Kazakhstan; Lithuania; the former Yugoslav Republic of Macedonia; Poland; Senegal; the Seychelles; Spain; Switzerland; Taiwan, China; Tajikistan; Togo; Trinidad and Tobago; and the United Arab Emirates. Second, *Doing Business* sorts these economies on the increase in their distance to frontier score from the previous year using comparable data.

Selecting the economies that implemented regulatory reforms in at least 3 topics and had the biggest improvements in their distance to frontier scores is intended to highlight economies with ongoing, broad-based reform programs. The improvement in the distance to frontier score is used to identify the top improvers because this allows a focus on the absolute improvement—in contrast with the relative improvement shown by a change in rankings—that economies have made in their regulatory environment for business.

Ease of *Doing Business* ranking

The ease of doing business ranking ranges from 1 to 189. The ranking of economies is determined by sorting the aggregate distance to frontier scores, rounded to 2 decimals.
